

PROJECT 10073 RECORD CARD

1. DATE 12 May 1961	2. LOCATION Dallas, Texas	12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon <input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft <input type="checkbox"/> Was Astronomical <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical
3. DATE-TIME GROUP Local 1730 - 1830 GMT 12/2330 - 13/0030	4. TYPE OF OBSERVATION <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar	<input type="checkbox"/> Other <u>Poss Birds</u> <input checked="" type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Civilian	
7. LENGTH OF OBSERVATION	8. NUMBER OF OBJECTS 3	9. COURSE
10. BRIEF SUMMARY OF SIGHTING Three objects observed as they flew in circles S of the observers location.		11. COMMENTS It is probable that the objects observed were birds reflecting bright sunlight. There is little evidence available in this report and it is therefore, classed as "Insufficient Evidence."

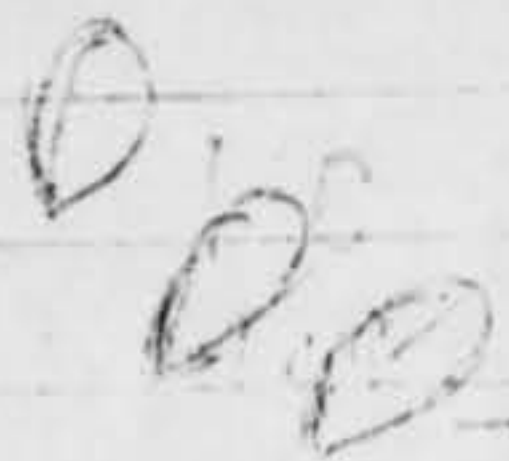

Report I had of Horn Saucer Aloues.

1. ~~_____~~
2. ~~_____~~

3. May 12, 1961

4. time about 5:30 to 6:30 sun
was about 30° degrees before
setting (near sunset)

5. I was ^{was} on ground watching the
sky the saucers (3) were
disc shaped and stayed
at approximately same length
apart or in geese type
formation and about 40°
above horizon. I was facing
southwest were they also
changed. Clear day about
 80° outside. maybe has
Saucer looked something
like this:

 Note Tail

It was dull color at
first

8

It had apparent size of a
penney. It moved very
swiftly. There was a
jet airplane circulating
about a 100 mile radius.
The plane was traveling
so high not any ~~person~~ could
see head. It stayed
about 30 miles behind
the plane and lower
put had a much greater
speed. I could say it
made turns at over 300
miles an hour. I once
I am in R.A.T.C. in school
I seen films with jet
airplanes and no airplane
jet or otherwise could
make turns at such
great speeds. I could see
it clearly but I was
at a great distance. The
most unusual part was
the maneuverability of the
machine. Another is
that the object when

when it ~~flashed~~^{to} changed course the sun
seemed ~~to~~^{to} glare off the ship.
But it was the type
of glare from a metallic
substance, it seemed
to be solid and was very
clear. Saucer was not
near sun or moon and
very few clouds were
in the sky and very
little clouds where the
saucers were. The
movement did not
coincide with wind
but stayed same length
apparent no wobbling.
When it ~~changed~~^{stayed} in course
you ~~could~~^{could} see the edges which
made it hard to see.
My mother also saw
the ship ~~in~~
~~at~~ Dallas Texas
The sun setting was
not unusual. No search
light possible.
Yours truly
