7. LENGTH OF OBSERVATION 5 minutes	8. NUMBER OF OBJECTS one	9. COURSE N-S	
10. BRIEF SUMMARY OF SIGHTING Round object, twice the size of a pinhead at arm's length, blue-white. Appeared to be lighted. Color and shape comparable to a star. Appeared at 60 deg elevation to the North with compass reading 350 deg. Disappeared at 60 deg elevation to the South with a compass reading of 190 deg. Moved across the sky in an arc. Course and speed appeared erratic. No sound.		11. COMMENTS Too slow for meteor and duration is excessive. Balloon would have been moving against the wind at altitudes above 6,000 ft. Speed much too slow for a/c. The available evidence is sufficient, however no conclusion can be reached and the case is listed as unidentified.
