Moon set at 1337 and would not rise until 0055 on 7th. This sighting was reported by a young witness and it is not surprising that he would not realize that outline of a/c could not be seen. Facelags show up because lights are on this part of a/c; there is no evidence which would indicate this objt was other than an a/c.

DATE July 22, 1961

I was returning to my bunk when I was drawn to the fact that the sky was remarkably full of stars since it was a very clear night. I thought I might spot some stars that I was familiar with. I was watching the big dipper and the north star when I saw this red and white lighted object move ~~over~~ across the area. At first I thought it was an airplane, but it appeared to be flying too high and had no wings. I called out many other boys to see it, that is why I lost entire bunks not having seen it. I later learned that a counselor had seen it for much longer than I did. He ([REDACTED]) has filled out the

other questionnaire. I then decided to write to
the New York Times and the Air Force
The Times replied that they would not
publish what I said.

Washington, D.C.

Gentlemen:

On the night of July 6, at 10:26 P.M. (New York Time, E. S. & T.) a flying object, identified as long and slender with a red light at the front followed by two ~~red~~^{white} lights, was first sighted, due north travelling northeast, covering this area in approximately three minutes.

It was located, first, between the pointer stars of the big dipper and the north star, at a direction of N-NE. It travelled below the north star,

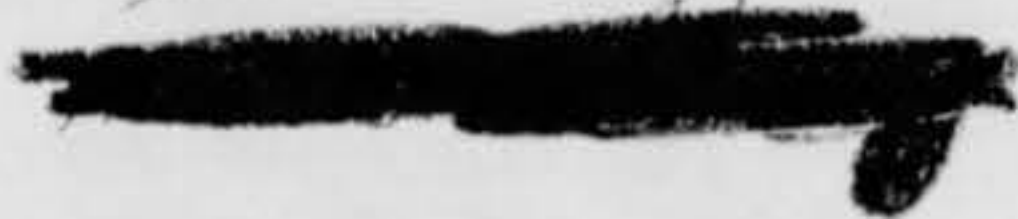

and was last sighted at a
north-east direction heading
north-east. Enclosed is a diagram,
reproducing to the best of our
ability, the travel of this craft.

Please send us, at your earliest
convenience, all information you
have pertaining to this object.

To our knowledge this was
not an airplane, since in this
location there are not many
planes and this was flying too
high for a commercial craft.

Thank you.

Sincerely,

A thick black horizontal line redacting the signature of the sender.
