Dear Editor:

I am interested in contacting anyone who may have taken pictures of that UFO we had last Friday, because the pictures we took show that it was absolutely not a weather balloon, and I wanted to compare the pictures if someone else took some.

A student took some pictures of the UFO and believe you me it is something rather shocking to learn about, because that old idea of the things being actually round have come to pass with the pictures we now have. We developed them and have made prints of same; therefore, it would be most interesting to see other prints if any were taken.

Thank you,

[REDACTED]
