7. LENGTH OF OBSERVATION 3 1/2 hrs		8. NUMBER OF OBJECTS 1	9. COURSE NNE		
10. BRIEF SUMMARY OF SIGHTING Oval shaped, blue-green-orange-yellow objt with diffused light around it observed in NNE for 3 1/2 hrs. Movement very slow toward NNE.			11. COMMENTS Witness probably did not know how to use his telescope, as elevations and az are very general. First Magnitude star Capella was in NNE at time of sighting, at a lower altitude. Taking into account an error on part of witness, coupled with appearance and duration of sighting it is quite possible that witness was reporting star Capella.
