7. LENGTH OF OBSERVATION 3 min		8. NUMBER OF OBJECTS 1	9. COURSE SE		
10. BRIEF SUMMARY OF SIGHTING 2 small round objts. black turning to red glow with black smoke trailing moving SE and gaining altitude. Sighted twice 1/2 min each time.			11. COMMENTS Objts probably condensation trails on high flying a/c. a/c probably flew into shadow line and this accounted for their disappearance. Red color can be attributed to atmospheric refraction and associated diffusion. Fact that jet a/c were known to be in area tends to substantiate this conclusion.
