10. BRIEF SUMMARY OF SIGHTING Students observing Jupiter viewed objt through telescope going S fm 30° elev disappearing at 60° elev. Greenish yellow color, no soun.			11. COMMENTS Objt responsible for this sighting was probably a meteor. Description of objt matches that of a classic meteor. Green color reported by witness is usually associated with that class of meteors known as fireballs. Fact that more than 1 objt was reported is probably due to meteor breaking up n just prior to burnout. There is no evidence available indicating objt was anything other than a meteor.	

Ltr, 8436 AF Reserve Recovery Group, Raleigh, North Carolina, 22 Dec 61,  
Report of Flying Object

2nd (WDO-INTL)

2 JAN '62

Hq 464th Troop Carrier Wing (A), Pope AFB, North Carolina

TO: Air Technical Intelligence Command, Wright-Patterson Air Force  
Base, Ohio.

This office received the attached UFO sighting report 2 Jan 62.  
Attachment #2 is a report on weather conditions at the approximate time  
of the reported sighting from the Pope AFB and Raleigh, N.C. weather  
stations. Due to the time which has elapsed since the reported sight-  
ing this office contemplates no further action.

~~██████████~~  
~~██████████~~  
Raleigh N.C.  
Dec 17 - 1961

The accompanying sketch is, to the best of my artistic ability, what ~~██████████~~, a sophomore at N.C. State College, a student of Frank Campbell College and I saw in the sky.

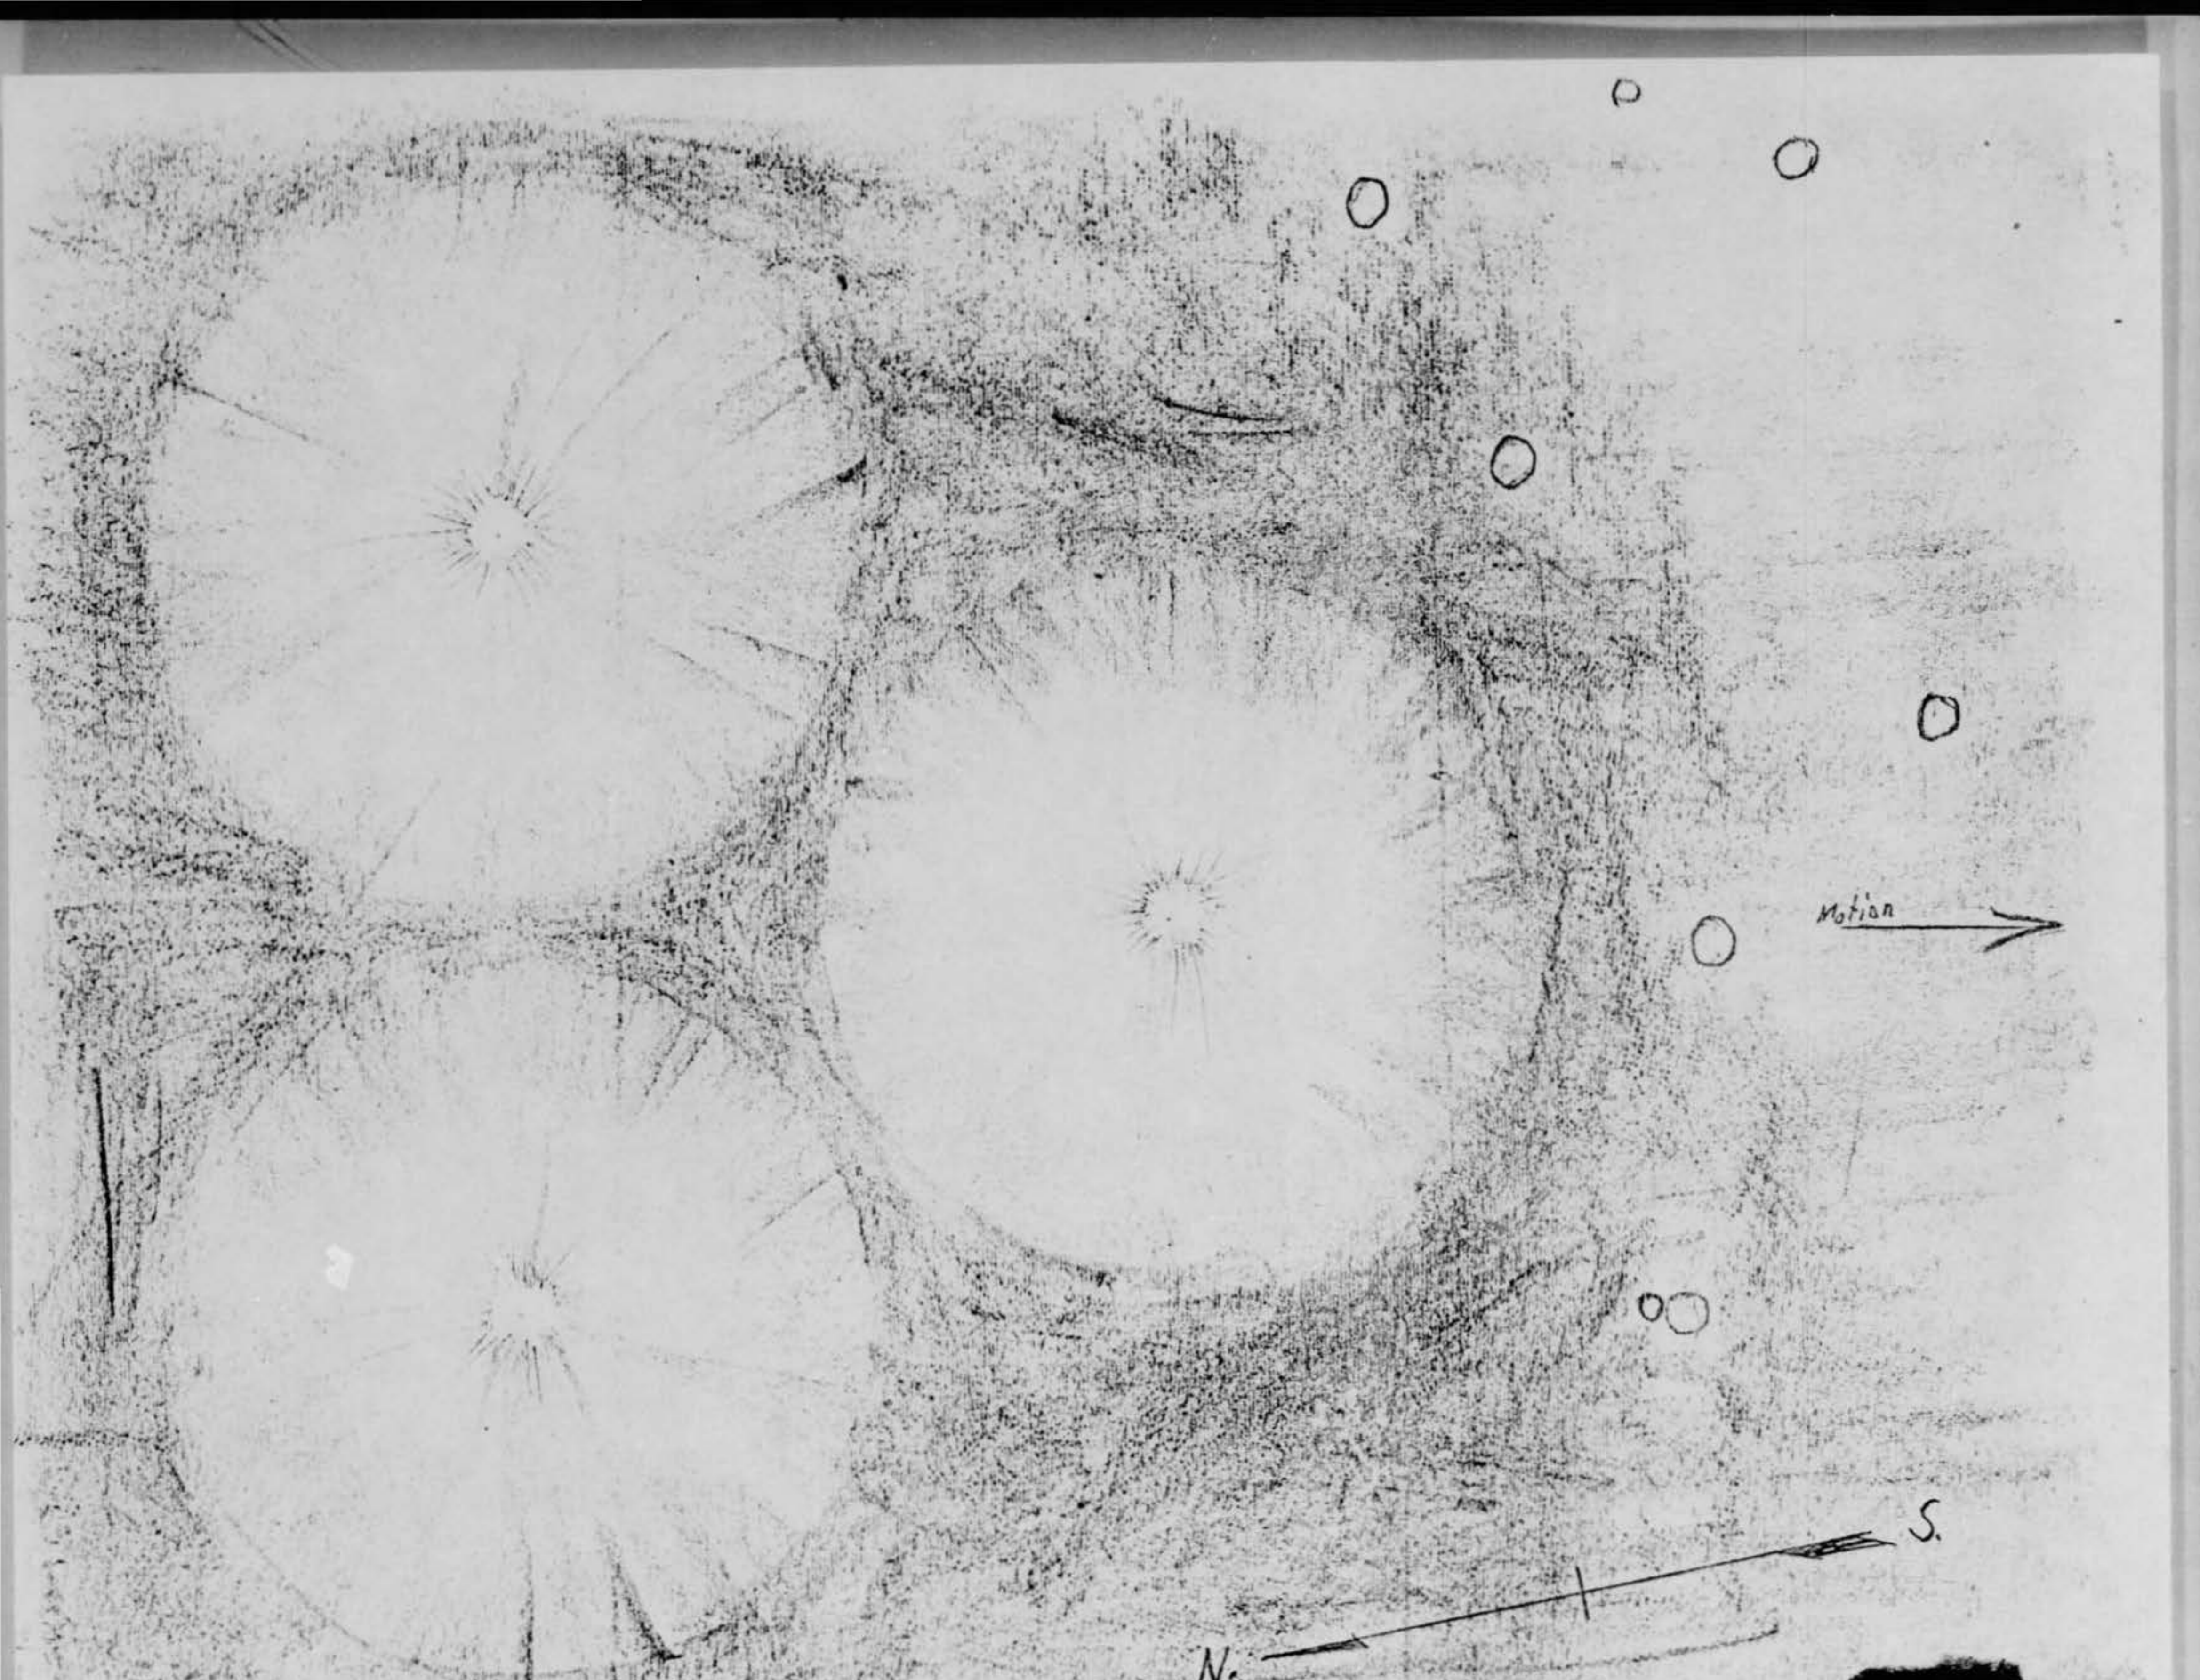

We were observing Jupiter in my Telescope - we looked in the direction of Pleyades for another possible telescope object, when this object appeared in our view from above a tree about  $30^\circ$  to the vertical - moving very nearly south - where it went out of view over trees - about  $60^\circ$  to the vertical - Time elapsed about three or four seconds -

The air was very clear - No Moon - No clouds in any direction, Temperature about  $60^\circ$  - very comfortable for staying out with the telescope - Time around 10:00 P.M., 17 Nov 61, we could see clearly the outline of a plane that passed about 20 minutes later -

We could not see any outline of any object - only the lights - they were in the center of the lighted area (see sketch) and appeared as if they were shining through translucent glass - all three were the same color - greenish yellow - Absolutely No Sound accompanied this phenomenon - they seemed to move as a unit - ~~██████████~~

███ #1

Lights observed. Compared to Pleadies - approx - size and position
