10. BRIEF SUMMARY OF SIGHTING A cylindrical, extremely bright ball of fire, size of a baseball, white in color with a red tail, flashed across the sky from NNW-ENE. The witnesses reported that object disappeared instantly. No sound.		11. COMMENTS SPADATS was contacted regarding satellite decays and this sighting could not possibly be due to this. The object was probably a meteor. The apparent brightness further suggests that it was of the fire-ball class. No information available indicating that this object was not a meteor or that it was a threat to the security of the United States.
