

## PROJECT 10073 RECORD CARD

1. DATE 16 May 62	2. LOCATION Charleston, W. VA.		12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon
3. DATE-TIME GROUP Local _____ GMT 17/0145Z	4. TYPE OF OBSERVATION <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Civilian		<input checked="" type="checkbox"/> Was Astronomical Meteor <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical
7. LENGTH OF OBSERVATION	8. NUMBER OF OBJECTS	9. COURSE SW	<input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING Round objt like yellow light. With hazy ring and hazy trail fm ring. Appeared to be moving many times faster than a jet type a/c. But not as fast as a shooting star. Observed at 45° elev in NNE. Disappearing over horizon in SW after 5 sec flight.		11. COMMENTS Reported as slow. However duration and distance traveled indicate normal speed for meteor sighting. Objt has all characteristics of a "Fire Ball" sighting and there is no reason to suspect that this was anything other than a meteor.
