This object appeared & disappeared 4 times in 45 minutes totaling about five minutes for each visible appearance. It moved in clockwise direction while the bottom part or motor part moved in a much faster speed in counter clockwise direction. When the object decided to disappear it moved at a terrific speed. However while it circled in motion it appeared to move only about 300 to 500 M.P.H.

The small area it covered in

I'd suggest the possibility of a

certainly a mistaken identification.

it was a balloon at very high altitude.
