

PROJECT 10073 RECORD CARD

1. DATE 2 June 1962	2. LOCATION Southwest Canada 5543 N - 12008 W		12. CONCLUSIONS <input type="checkbox"/> Was Balloon <input checked="" type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon
3. DATE-TIME GROUP Local <u>1743</u> GMT <u>2/0134</u>	4. TYPE OF OBSERVATION <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input type="checkbox"/> Was Aircraft <input checked="" type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft
5. PHOTOS <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	6. SOURCE Civilian		<input type="checkbox"/> Was Astronomical <input type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical
7. LENGTH OF OBSERVATION 4 Min.	8. NUMBER OF OBJECTS 1	9. COURSE	<input type="checkbox"/> Other <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown
10. BRIEF SUMMARY OF SIGHTING An object resembling a weather balloon and reported to be the size of a basketball at arms length was reported by one witness in SW Canada. The object was reportedly moving S and was observed for 4 min. Then witness stopped watching. Object was observed through 10x50 binoculars.		11. COMMENTS Witness was using binoculars to observe this object and this is probably cause for estimate of objects size as that of basketball at arms length. Four min. is hardly long enough to watch a slow moving object and determine accurately its direction of motion. Is probably balloon. One witness case.
