July e, 1965 Licar Sies, I have been enterested in theronautics and Space research. for some time. I first gained imformation and a touch of interest when I recieved a book on The NASA. I was wondering if you could spare some information. my friend and I are perening en making a commette charge of speace of researche. He planned the when we saw queer plying object in a vacant area at night. There objects, three of them, were round and had each a different color ste paw the told seople about it but they did not believe us, of course.

The know it sounds like some but we know its the truth. So, if you could, well you please sind us information on space research, aeronautics, unknown flying clyect, etc. tur on each Think for it's I thought it may helpe me tett you - believe where schat So you Think & my address The Brunswich The

Dear Mr

Reference your observations of unidentified flying objects. In your letter of 8 July 1965 you did not give sufficient information for evaluation. Therefore, it is requested that you fill out the attached FTD Form 164 and return it in the envelope provided, in order that we may make an evaluation. The Air Force appreciates your interest in this subject.

Sincerely,

HECTOR QUINTANILLA, Jr Major, USAF Chief, Project Blue Book 2 Atchs 1. FTD Form 164

U.S. AIR FORCE TECHNICAL INFORMATION

This questionnaire has been prepared so that you can give the U.S. Air Force as much information as possible concerning the unidentified aerial phenomenon that you have observed. Please try to answer as many questions as you possibly can. The information that you give will be used for research purposes. Your name will not be used in connection with any statements, conclusions, or publications without your permission. We request this personal information so that if it is deemed necessary, we may contact you for further details.

27. In the following sketch, imagine that you are at the point shown. Place an "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.

29. IF there was MORE THAN ONE object, then how many were there?

Draw a picture of how they were arranged, and put an arrow to show the direction that they were traveling.
