secondary ones all emitted at once
or at various times. I guess at
once, if they went off in "arrowhead"
formation. A phone call to the
coop might be good - probably could
trip him up on that arrowhead
business.

Winds were about right for a
run - some sort of experiment?

But with only 1 barrel I think
it'd be justified in saying
a form to fall out. 1/2 the
to see what he does with it.

judgments in this case I believe. The
speed, time of observation, course N 5
E course, and direction of N.E. + the lat
I have a hunch that if you
check the passage time of Echo you'll
find that it was in the vicinity.
I don't know the Echo schedule
for that date.
If not, we can remember that
this was July 4th and it
have some connection!
