

**PROJECT 10073 RECORD CARD**

<b>1. DATE</b> 20 October 1962		<b>2. LOCATION</b> Pacific Grove, California		<b>12. CONCLUSIONS</b> <input type="checkbox"/> Was Balloon <input type="checkbox"/> Probably Balloon <input type="checkbox"/> Possibly Balloon	
<b>3. DATE-TIME GROUP</b> Local _____ GMT 21/0730Z		<b>4. TYPE OF OBSERVATION</b> <input checked="" type="checkbox"/> Ground-Visual <input type="checkbox"/> Ground-Radar <input type="checkbox"/> Air-Visual <input type="checkbox"/> Air-Intercept Radar		<input type="checkbox"/> Was Aircraft <input type="checkbox"/> Probably Aircraft <input type="checkbox"/> Possibly Aircraft	
<b>5. PHOTOS</b> <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No		<b>6. SOURCE</b> Civilian		<input type="checkbox"/> Was Astronomical Meteor <input checked="" type="checkbox"/> Probably Astronomical <input type="checkbox"/> Possibly Astronomical	
<b>7. LENGTH OF OBSERVATION</b> not reported		<b>8. NUMBER OF OBJECTS</b> one	<b>9. COURSE</b> Westerly	<input type="checkbox"/> Other _____ <input type="checkbox"/> Insufficient Data for Evaluation <input type="checkbox"/> Unknown	
<b>10. BRIEF SUMMARY OF SIGHTING</b> Ball of light, dark greenish about 7 inches in diameter, observed through window in horizontal flight. First thought object was shooting star.			<b>11. COMMENTS</b> General description indicating meteor sighting. Duration not reported but object compared to shooting star.		

[REDACTED]  
Calif., Nov. 10, 1962.

Flying Saucer, Dept. of Phenomena,  
The Pentagon  
Washington, D.C.

Sirs: Flying Object (?) - Saturday  
Oct. 20, 1962, approx. 11:30 p.m.  
at Pacific Grove, Calif.

Many days overdue in this report which  
at a second thought I must send off.  
(Time flies!) ; (4 days later reported at Police Station);

Thing & Time & Place: In my bedroom to re-  
tire; in good health;  
fully clothed; my mind a complete blank &  
watching nothing; with light out I sat on my  
bed which is approx. 6 ft. from the window  
(usually retire between midnight & one a.m.);

- On Oct. 20, 1962, Saturday, 11:30 ± p.m.; I saw;

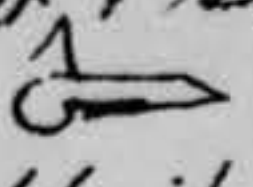

- I was attracted by a ball of light dark  
creamish, approx. 7 inches (seven) in  
diameter; at the left of the corner of my  
left eye; this beyond the window straight  
ahead;

- Saw a light reflecting on an arrear-  
part eight to ten inches or less ~~thick~~  
color could have been white transparent

I reduce this particular seeing  
to: light radiating from a point only  
dims that part of emergence only  
the visible part would be the opposite  
surface on which the glow is received

(2)

- The glow was then in full open-air; or glassed-in-area; or did I see it through the outer wall — light does penetrate all things, one could see that sometimes; (Color seeing at close range could have been transparent white);
- The thing proceeding to the outer sea area from Monterey area (I connect to; seeing first at left then fully ahead.) Did not have presence of mind to check it through an open window;
- gave off no noise whatsoever;
- First thought - shooting star? With exceptions, such does not function horizontally;
- Though I have no ground for my judgement none whatsoever (for I saw not its shape) thought it went whizzed-past my window. But words only get in the way; but might add I didn't think it went this way: →, and looking like ~~!!~~ <sup>or cup shape</sup> I keep thinking it went like an arrow, <sup>or cup shape</sup> somehow think of its shape as  (beam looks like an arrow, <sup>or cup shape</sup> didn't it -- BUT DON'T GO BY MY DIAGRAM (I didn't see it!));
- My window of the second story, lowest frame begins about halfway low cottaged out, the windows begin their roofs; went slightly above the roof ... LOW;

The more I try to visualize again & explain differently by various words, I come up with the very first explanation of the Seeing, i.e. amounts to it.

Sincerely

Boyscott

Pacific Grove, Calif.
