UNIDENTIFIED FLYING OBJECT REPORT
HEADQUARTERS 19th COMBAT SUPPORT GROUP (SAC)
HOMESTEAD AIR FORCE BASE, FLORIDA 33030

I. INTERROGATION:

a. Date: 6 April Time: 1247 PM Location: Christina Elem school

b. Observer(s) Name: [REDACTED] Age: 32 Occupation: Teacher

Education: [REDACTED] Tech Qual: NO

Address: [REDACTED] Phone: [REDACTED] Est of Reliability: Good

Name: [REDACTED] Age: [REDACTED] Occupation: [REDACTED]

Education: [REDACTED] Tech Qual: [REDACTED]

Address: [REDACTED] Phone: [REDACTED] Est of Reliability: [REDACTED]

Name: [REDACTED] Age: [REDACTED] Occupation: [REDACTED]

Education: [REDACTED] Tech Qual: [REDACTED]

Address: [REDACTED] Phone: [REDACTED] Est of Reliability: [REDACTED]

c. Sighting: Yes Date: 6 April Time: 1247 Location: NW from school beyond poles.

d. Observer(s) account of weather conditions: Some clouds - but clear.

Light conditions: Excellent

e. Description:

(1) Shape: disc shape 

(2) Size (compared with known object held at arm's length): 6' across

(3) Color: metallic silver

(4) Number and/or formation: 1

(5) Discernible features or details: NO

(6) Tail, trail, or exhaust (compare size to object): NO

UFO Report (continued)

(7) Sound No Other features pe

Observation:

(1) What first attracted your attention? Kids saw it

(2) Angle or elevation and azimuth when first observed

(3) Angle or elevation and azimuth upon disappearance

(4) Description of flight path and maneuvers Hovering

(5) How did the object(s) disappear? (instantly, it was hovering - disappeared)

(6) For what period of time was the object visible? 8 sec

Method of Observation:

(1) Visual sighting from ground? Yes Radar sighting from ground?

Optical aids? wearing glasses
did not have other aids

(2) Airborne sighting? Type aircraft

Altitude Heading Speed

Home Station Other facts

Other Observer Remarks:

10:30 black, oval-shaped (6' dia)
hovering 50' (50') students good character.

NEWS RELEASE

UNITED STATES AIR FORCE

HEADQUARTERS 19th BOMBARDMENT WING (SAC)

DIRECTORATE OF INFORMATION, HOMESTEAD AFB, FLA, 33030

(305)336-8610

HOMESTEAD AFB, Fla. (Apr 10) -- The Air Force has completed an investigation of the UFO sighting by the students and teachers of Crestview Elementary School of 2201 NW 187th St., at 9:45, April 7th.

The majority of the witnesses described the object as white with a red light that flashed once. The object was sighted along a line north-northwest of the school. Witnesses differed as to the size and distance of the object.

The investigation revealed that a Coast Guard helicopter, white with red trim, was maneuvering in the area of North Perry Airport between 9:31AM and 11:07AM the morning of the report. The helicopter was practicing landings and takeoffs in ~~an~~ East-West direction between ground level and 1000 feet altitude.

North Perry Airport is almost due North of the elementary school and approximately three miles in distance.

(MORE)

HOM 67-4-3

PEACE IS OUR PROFESSION

Attach D

The Air Force concludes that given the time of the day with the angle of the Sun and the unfamiliar maneuvering of the white and red helicopter the witnesses could not identify it as such.

As to the number of objects sighted the white and red objects was the only consistent description given. The Air Force attributes the other objects to the high number of small aircraft activity in the vicinity of North Perry Airport.

10 Chaotic Minutes, at

By MIKE PETTE
Herald Staff Writer

Little girls screamed, boys pointed and three teachers followed nervous fingers to the object above the tree-tops.

Friday was the day of the "flying saucer" happening at Crestview elementary. It was the biggest thing since runaway bull lumbered onto school grounds last September.

It was "Twilight Zone," "The Invaders" and "Outer Limits" all rolled into one, five minute show. Only this time, said 12-year-old freckled-face Andy Cohen, "it was for real."

Andy has witnesses -- several hundred in fact. Whatever it is people see when an unidentified flying object appears, they saw in Northwest Dade Friday.

The object -- some of the kids and two of the teachers said there was more than one -- appeared in a tree-dotted field behind the school a little after 10 a.m.

The next 10 minutes were chaotic.

"There was a lot of excitement!" said Mrs. Virginia Martin, a sixth grade teacher. "I didn't pay any attention to what the children were pointing to at first, I was trying to get them lined up."

Most of the 100 girls and boys at morning recess were running toward the school ground fence, yelping and pointing.

"They said 'You've got to look, you've got to look' and I did," Mrs. Martin said.

When Mrs. Martin, fourth grade teacher Holly Aotal and sixth grade instructor Miss Marion Waters spotted appeared to be hovering behind a pine tree in an open field.

Attach E

—HERALD STAFF PHOTO BY CAMON BERNARDY

and the Kids Screamed

"It was oval shaped. It seemed to hover. I realized that an airplane doesn't do that. I thought, my gosh, this couldn't be happening."

The school is located at 2301 NW 187th St. The tents are directly north.

"It seemed to move in toward the school, then went straight back and crept below a pine tree. It came up again and went westward."

"I don't know what it was. Don't say I said it was a flying saucer or an unidentified flying object, because I just don't know," Mrs. Martin exclaimed.

Teacher Bob Apfal exhibited no qualms. "It was a flying saucer," he said matter-of-factly.

When asked what he saw, Apfal returned the question:

"Which say?"

The fourth grade teacher said Friday was the second day he and his class saw the same, metallic like object north of the school grounds.

"One hovered northwest of the school about 12:47 a.m. Thursday, Apfal said. "We were going back into the school when the children pointed it out to me."

The teachers spent Friday afternoon talking to three Air Force investigators who drove to the school from Jomestead Air Force Base.

The children crowded newsmen, cameramen and

adults — almost anyone who would listen — and chattered in unison, drowning out each other's voices.

"They looked like big cigars they were red, silver they were flying apart the girls got scared I saw them, hey, I saw them" the voices ran together.

Andy Cohen, of 1951 NW 188th Ter., became the closest to a consensus spokesman for the kids. He sat in a car and told what he saw. His mother, Mrs. Deborah Cohen, listened a curious half-smile crossing her face.

"They looked like long cigars. They were flying apart one at a time. Some of the girls got hysterical when they saw them. Jeff Moore's sister ran into the class and grabbed Jeff."

"Oh, Jeff, she screamed," Andy said.

Later in the day, it was discovered that the UFO sightings were not limited to the children and teachers at Crestview.

*Mrs. Mary Troesser, who is staying at the home of a daughter at 800 NW 190th St., called the Herald to inquire about any "strange sightings."

Mrs. Troesser had been out in the yard and happened to glance in the direction of Crestview Elementary School.

"There was this oval object with red lights just over the trees . . ."

AF Says 'It' Was Copter; People Who Saw It Say No

By FRED BRUNING
Staff Writer

While sightseers spent the weekend pointing to the sky and shouting to the children who yelled out to the trees where "it" hovered, the field over which "it" flew, the Air Force was working on an answer.

And Monday the answer came. The "sighting" of an unidentified flying object Friday evening by 200 Crestview Elementary School children and their teachers was, in fact, a helicopter practicing take-offs and landings.

The Air Force conclusion came after a term of three months spent Friday afternoon at the site and interviews with witnesses.

"The majority of the witnesses described the object as white with a red light that flashed once," the report said. "The investigation revealed that a Coast Guard helicopter, white with red trim, was maneuvering in the area of North Perry Airport between 11:01 a.m. and 11:07."

North Perry Airport is some three miles north of the Crestview school which is located at 2201 NW 157th St.

"The Air Force concludes that given the time of day with the angle of the sun and the unfamiliar maneuvering of the red and white helicopter, the witnesses could not identify it as such."

Bob Apfel is one of those "witnesses." Friday he saw what the children pointed at and said: "It was a flying saucer."

Monday he heard the Air Force report. "I'm in complete disagreement with the Air Force," he said but would not discuss his differences.

Since the "sighting" his phone has rung frequently, his life has been interrupted, magazines have approached him about his "story."

"I have no reason to tell anything but the truth," he said. "I'm not sorry for anything I said..."

Among the children, Andy Cohen of 1901 NW 188th Ter. spoke of the incident Friday, the day he saw the "long cigar" in the field behind his school.

Andy says the Air Force is mistaken. If his "cigars" were helicopters, he said, "you would have been able to see something that looked like ordinary planes."

Of the four objects the boy says he saw, only one was white.

Reports of UFO's have brought members of the National Investigations Committee on Aerial Phenomena to the Crestview neighborhood.

John Gramlich, a NICAP member and senior at the University of Miami from Arlington, Va., said: "I'm convinced it wasn't a helicopter and I doubt any conventional object would excite the kids this much."

Of the half-dozen witnesses Gramlich has interviewed, none has reported the object producing any sound.

"How do they account for

it being completely silent?" he asks.

But the Air Force is resolute. Lt. Bob Clark of the Homestead AFB public information office said "eyes can play tricks."

"You can attribute something to the excitement of the moment."

The Air Force Won't Admit It

Are there flying saucers? Have you ever seen one? Well, if you have don't tell the Air Force. They will only tell you there is no such thing and that what you saw was a helicopter, a kite, or something other than what you saw.

Why doesn't the Air Force admit that there is definitely something up there (something out of this world)? Is it because they don't want to panic the human race or is it because they are afraid to believe it themselves?

FRED BLACK

Attack F

Children Confend:

'Air Force Wrong About Dade UFO'

It was a helicopter, said the Air Force. Not so, retorted three teachers and 200 school children who were frightened by the unidentified flying object last Friday at Crestview Elementary School in North Miami.

"It was a flying saucer," stated Bob Apfel, one of the teachers who helped herd the terrified children indoors when the pie-shaped object hovered at tree-top level beyond the

school playground for several minutes before darting off.

Lt. Bob Clear, of the Homestead Air Force Base Public Information Office, concluded after a study of the incident that it was a Coast Guard helicopter making practice landings at an airfield three miles away and the witnesses' eyes had played tricks on them.

"The majority of the witnesses described the object as white with a red light that flashed

once," the Air Force report said. The investigation revealed that a Coast Guard helicopter, white with red trim, was maneuvering in the area of North Perry Airport between 9:31 a.m. and 11:07 a.m.

"The Air Force concludes that given the time of day with the angle of the sun and the unfamiliar maneuvering of the red and white helicopter, the witnesses could not identify it as such," the report concluded.

Apfel said he was "in complete disagreement with the Air Force."

So is John Gramlich, a member of the National Investigating Committee on Aerial Phenomena (NICAP), who said that "I am convinced it wasn't a helicopter."

He said the witnesses he interviewed all said the object did not make any sound. "How does the Air Force account for it being completely silent?" he asked.

Smiles away! stupid!

EYEWITNESS REPORT

Return Of The UFO

By BILL BARRY
Reporter of The Miami News

The things were back in the sky Saturday.

John Wolf had been out with his sons at the Boy Scout Campsite. He had to come back to his house for water and ice and other supplies. When he drove up his daughter, Judy, said: "They're back."

So Wolf got his binoculars and he went over to the field just past the Coxsview School. He was thinking: "Sure, I believe there could possibly be something around. I probably won't see it though. It always happens to other people."

There were 20 or 30 people standing around on the dead-end road and in the field. They were looking north and some had binoculars. John Wolf looked and there they were.

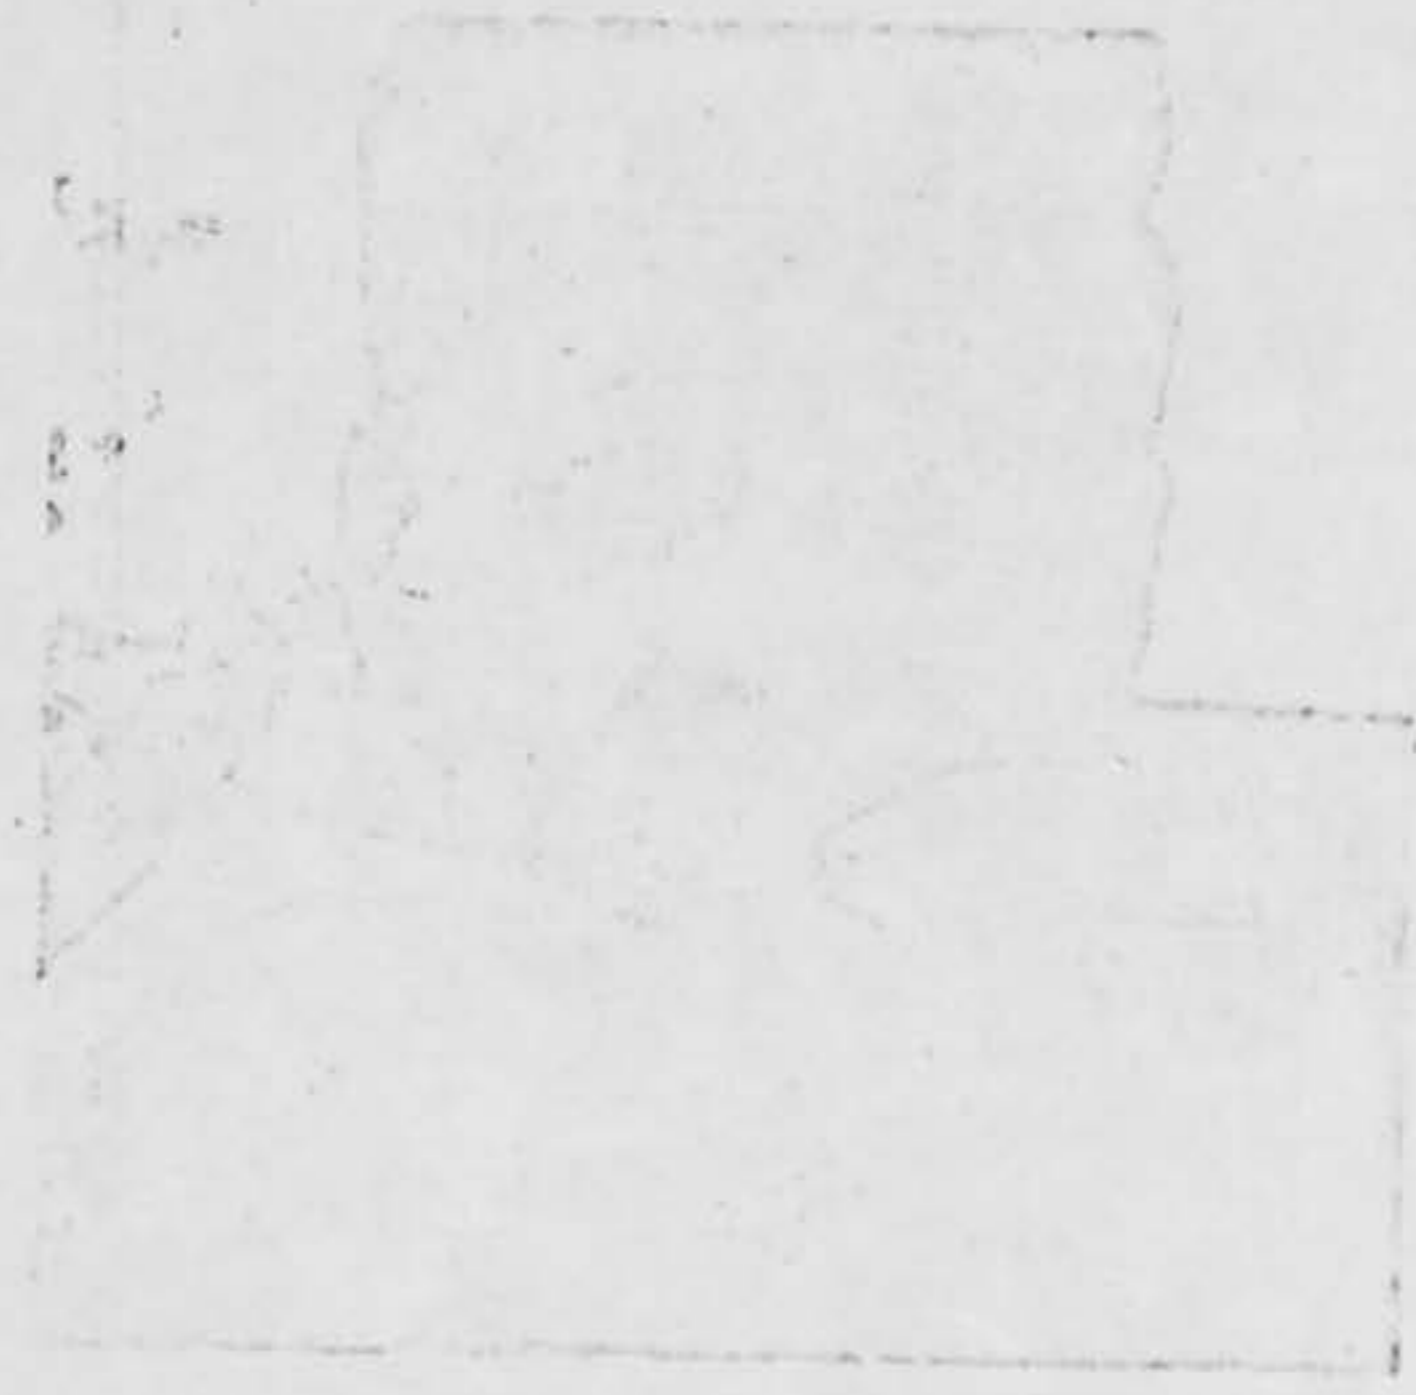

It looked like three or four things were out there. They were hovering just behind a line of trees.

They seemed to change shape from oval to cigar-shape and back again. They seemed to change size. They were globes of white with red flashes in them. On top there seemed to be a dome — like the glass dome on a coffee pot.

At the same time he was seeing them, Wolf could see the airplanes from North Perry Airport flying around. He could see the detail in the planes but there was not much detail in the things.

Sometimes they would rise up in pairs. They would peel off to the right and one would peel to the left. Both would rise a little more and then sit there.

Every time a plane approached one of them something astounding happened, Wolf said. There would be no motion but the thing suddenly just was not there any-

Miami News Photo by Charles Trainor

John Wolf... 'They Were There'

more. When the plane left, the thing always reappeared — almost in the same spot.

They were like pogo sticks, jumping all over the sky.

John Wolf watched them for nearly an hour. Then he went home and got his wife. She nearly laughed herself hysterical when he told her what he had seen. She went back to the field with him and looked for herself.

She stopped laughing. The things were still there.

It was a bright, clear day.

~~Named To Council~~

~~Appointment of John M. Dyer, professor in foreign trade markets at the University of Miami, to the Florida International Development Advisory Council was announced today by the Florida Development Commission.~~

There were just a few clouds. The things were below the clouds. Sometimes they flew below the clouds and sometimes they flew off to the sides — out of the range of the clouds.

When they got away from the clouds, John Wolf knew that he was not seeing a refraction from the clouds. He knew that he was not seeing airplanes. He knew that he was not seeing helicopters.

But he didn't know what he was seeing.

There was no sound. There was no exhaust smoke. The things looked like they were a couple of miles away.

There were no houses between Wolf and the things. There were a few small rises and open space. Then the line of trees behind which were the things. Wolf looked with his bare eyes and then he verified what he was seeing with his binoculars.

Wolf was fascinated. But he did not get scared. He wanted to know what he was seeing.

Toward afternoon the things slowed their activity and then they went away.

Wolf had watched them for about an hour and a half. So did a few dozen other people — mostly adults. They all saw the same things.

John Wolf is 42. He is a father four times. He works in a printing office. He is in his second year of pre-education at Dade Junior College. He spent eight years in the Navy. Some of that time he was a plane captain on a flight service line.

He says: "I'm too old to be flippy about these things. I'd like to know what they were — even if someone proved I was having hallucinations."

The Air Force said that what everybody saw in the sky Friday was a Coast Guard helicopter on a training mission.

But that's not what John Wolf and the other watchers saw Saturday.

Because on Saturday, Wolf said, there were no Coast Guard helicopters up in that part of the sky.

Not one.

DEPARTMENT OF THE AIR FORCE
HEADQUARTERS 19TH COMBAT SUPPORT GROUP (SAC)
HOMESTEAD AIR FORCE BASE, FLORIDA 33030

Cipacocha, J.

REPLY TO
ATTN OF: BPR

4 May 1967

SUBJECT: Investigations and Findings

TO: FTD (TDETR)
Wright-Patterson AFB OH 45433

1. The following information is forwarded in accordance with AFR 80-17, para 7 a.

a. A report of UFO sightings was forwarded to Homestead AFB at 0945, 7 Apr 1967, from Crestview Elementary School located at 2201 NW 187th Street, Miami. Copies of the statements received from the three teachers are attached. (See Exhibits A, B, and C)

b. Further investigation revealed that a Coast Guard helicopter was operating in the general area around North Perry Airport, just three miles to the north of the school. Instructions were to hover no higher than 1000 feet and to perform "touch and goes" from the end of the runway. The helicopters were white with red and black markings. The maneuvers began at 0931 just fourteen minutes before the sightings were first made.

c. As the colorings corresponded fairly well to those reported, the maneuvers were in conformance to those on the attached descriptions, the range and direction of sighting are the same as that of the North Perry Airport, and the sun was in such a position as to possibly have caused reflected light to strike observers located south of any airborne objects, the Homestead AFB Office of Information, upon query demand, issued a news release on 10 April 1967. See Exhibit D.

d. Exhibits F, G and H give an accurate portrayal of both the radio stations' and newspapers' unfavorable reactions to the news release. All questions brought up subsequent to the release have not been officially answered as no further statements have been solicited from Homestead AFB by any news media. The atmosphere surrounding this incident is somewhat emotional. In fact, it appears that often times individuals reactions have been significantly influenced by their wanting to see some unidentifiable phenomena. Mass reaction to any stress situation often deviates from the norm which would be displayed had each person been isolated from those around him. Finally, once an individual unequivocally states that he saw a "Flying Saucer", normal psychological responses would tend to compel him to maintain his story against all attempts at

1003754

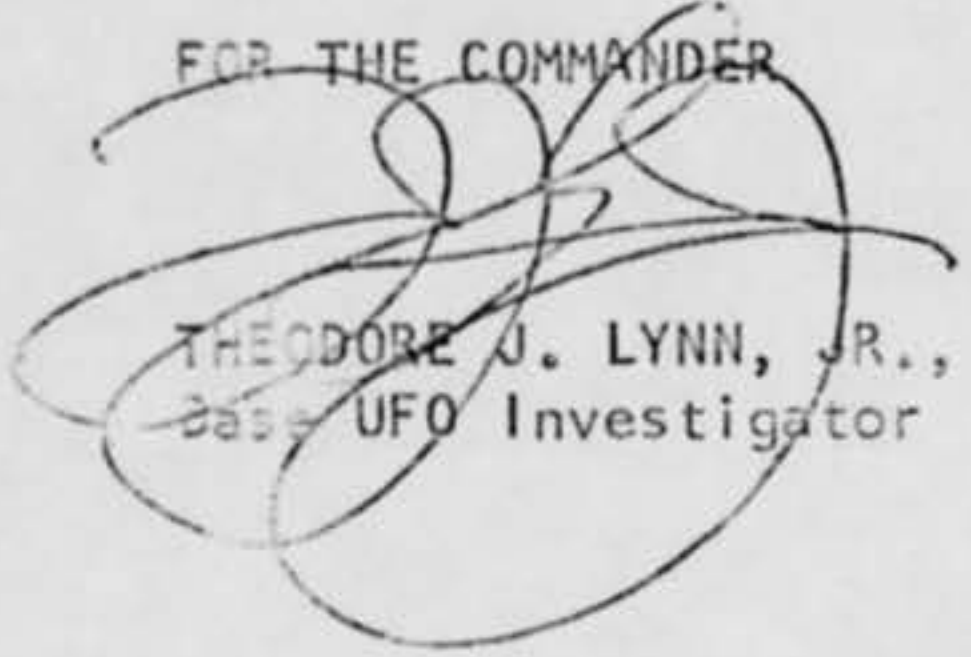

at logical solutions which vary from his account. The answers to such questions as "why was there no sound" and "why couldn't we see the rotors" seem obvious. Upwind observers might not even hear a jet engine run up at distances above one mile and props rotating at high RPM are hard to distinguish at close range, let alone at two to four miles.

e. In the wake of this first report, 15 separate unrelated reports were called in within a one week period. Many of these are still under investigation. Information on these will be forwarded, where applicable, as soon after investigations are completed as possible.

2. Below is listed information required by AFR 80-17 a:
