9. PHYSICAL EVIDENCE	
<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No	

25 Aug. 1967

Dear Major Quintanilla,

Being a Air Force veteran (1952-1956) I heard several talks or open discussions on U.F.O.'s at the Air Bases where I was stationed. These were more of an overheard nature than anything else. I really never paid any attention to what I heard on the flight lines. I thought maybe like your articles have claimed in several magazine articles I have read. Some of the things heard were indeed frightening to say the least. How true they were I couldn't tell you. I hope they were not.

In the past few years I myself, along with members of my family have seen lights that seem to be stationary in the sky and go out slowly like a light bulb. Sometimes they reappear lower in the sky and much larger than 1st visual contact. Last Sunday evening (20th of Aug. 8:30 P.M. - again)

at around 8:30 P.M. we saw what looked to be
 a small "star" in the Eastern sky, just north
 of Norwalk, Ohio on Rt 250. We were in my
 auto at the time so I stopped to get a better
 view to see if it was a star since no other
 stars were present in the sky. This star-like
 object dimmed slightly and slowly and then just
 went out. I got back in my car and proceeded
 south toward Norwalk, about 10 minutes later I
 and my father seen a very large (to) star like
 object over the tree line on the East direction
 of Rt. 250. Again I stopped my car, got out
 to look and be sure I wasn't looking at a
 windshield reflection. I wasn't, it was still
 there. It moved erratically, and slowly. It
 just plain went "out" and vanished completely.
 About 1 hr. later near Medina, Ohio we saw a
 brilliant object zoom overhead about the same
 color and size of the last Norwalk, Ohio sightings.

a couple of other cars stopped along Rt 250 in Norwalk, Ohio and seen exactly the same object that we saw. I just can't go along with the swamp gas or planet in the sky answer. This brilliant object moved slowly and erratically before it simply vanished. The sighting in Norwalk and on Rt 18 near Medina was about the size a small bead held at arms length Brilliantly colored like a very large starlike quality I would say covered its brilliance. I respect you and your job in the Air Force. The press hasn't been too kind to you to say the least. I have no bones to pick. I sincerely hope this letter may be of some help no matter how small it may be. I just wonder if anyone else has written you about this sighting near Norwalk or Medina at the time. If you have time I would like to hear from you. If not I will understand. Thank you
