Dear Sir:

I would like to report a sighting of an Unidentified Flying Object. It was sighted at approximately 9:20 P. M. EDT, on June 21, 1967.

It was in sight approximately five minutes. There was a bright, clear sky with many stars and a full moon. It first appeared, at the area 15 degrees above the southern horizon, as a light brighter than the brightest stars. This object appeared brighter as it moved overhead. It also appeared to stand still for a short time. When I first sighted it, it moved to the west and disappeared. It reappeared several moments later, several degrees higher. There was no sound, and the object was a bright white in color.

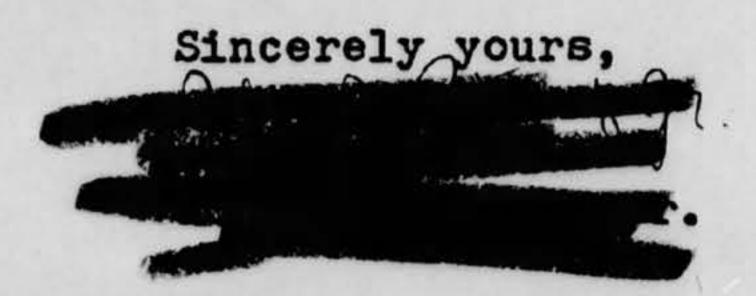

I viewed this object outdoors in a reside ntial section of Saratoga Springs. Through my Sears 75x telescope, it looked somewhat like two rectangular lights joined together. I could not focus into perfect clarity. About thirty seconds before the object disappeared into the northern horizon, I saw a plane in the sky near the object.

27. In the following sketch, imagine that you are at the point shown. Place ar "A" on the curved line to show how high the object was above the horizon (skyline) when you first saw it. Place a "B" on the same curved line to show how high the object was above the horizon (skyline) when you last saw it. Place an "A" on the compass when you first saw it. Place a "B" on the compass where you last saw the object.

28. Draw a picture that will show the motion that the object or objects made. Place an "A" at the beginning of the path, a "B" at the end of the path, and show any changes in direction during the course.
