UFOs at It Again

MOUNT CLEMENS, Mich., July 21 (UPI) — Several persons in Macomb County reported seeing unidentified flying objects in the sky Tuesday. The reports came from residents in Roseville, St. Clair Shores, Mount Clemens and from one man aboard a boat on Lake St. Clair. They reported seeing the objects around noon.

'Flying Saucer' Stopped Clocks?

VILA DO PORTO, The Azores — (AP) — The Azores Weather Bureau reported its electromagnetic clocks stopped for 45 minutes while a "cylindrical white object" was seen in the sky.

The object was moving slowly northeastwards at about 30,000 feet altitude, the weather office said.

FLYING OBJECTS (WHITE DISCS) OVER BUENOS AIRES
After 10 Minutes, They 'Flew Away at Great Speed'

Mystery object

SANTA MARIA, Azores (UPI) — An airport spokesman Saturday said a mysterious flying object apparently stopped all electro-magnetic watches at the Santa Maria Airport when it flew slowly over this island Friday. He said a white cylindrical object was seen flying northwest at an altitude of 33,000 feet and attempts to identify it were unsuccessful.

THE AUGUSTA
CHRONICLE-HERALD
SUNDAY, JULY 11, 1965

JOHN KEASLER *Look Up Here*

Slowly but inevitably, we flying saucer believers are gaining acceptance.

With each successful exploit humans make in space, we old pros in the saucer-believing game come that much closer to shedding our nut-fringe reputation.

It will be a great day when we are in the majority and can immediately start persecuting that new minority group, non-believers. "Ho ho," we can shout, "Look at Stupid, there, going around saying flying saucers aren't!" What jolly fun.

The latest "sighting" was when military and scientific personnel in the Antarctic saw a "celestial body" cruising around. It glowed with a white light, they said, hovered, hung suspended in the air, then took off like a striped ape. Ah, yes — Neptunians. (I have them classified: Venusians glow with a green light, Martians with a red light, Saturnines are gloomy, etc.)

Purple Elephants

It's such an old story to us veteran saucer believers. We've had it tough, believe me. I've taken calls from flying saucer seers on every paper I ever worked. Granted, many such calls come from individuals who also have seen amphibian purple elephants while using an empty muscatel bottle as a spyglass. But some of the people truly saw something inexplicable (I haven't, sadly) and our cult will soon triumph.

AMERICAN UFO COMMITTEE

A NON-PROFIT ORGANIZATION SERVING THE PUBLIC THROUGH ITS INFORMATION
AND NEWS REPORTING PROGRAM ON AERIAL PHENOMENA

Editorial

by Allen H. Greenfield, Editor
American UFO Committee Review

During October and November the American UFO Committee celebrates its second anniversary. It has been a trying two years. AMUFO was formed in an unusual way for UFOlogy, and is perhaps unique among large UFO organizations in that it was formed through a merger of a number of previous organizations, including the Research Organization of Aerial Phenomena (ROAP), The United Saucer Research Council of Ohio (USCO), the United Federal Observers Research Committee (UFORC), the Hawk Research Society (HRS), the Illinois Aerial Phenomena Agency (IAPA), and the United Research Council of UFOlogy (URCU).

With so many contingent organizations, one might expect a stormy period of confusion, followed by a conflict of interest over leadership. Actually, the former was not, we trust, as bad as some doom-mongers may have expected, and the latter, fortunately, never occurred at all. Our multiple leadership structure has proven quite successful, and in some ways may be said to be superior to the concept of a single, over-all director. AMUFO survived its initial bumps, and prepared to put forward its program for a better UFOlogy.

This, too, has been an ever-increasing success. In the summer of 1964 and again in 1965 AMUFO has participated in and co-sponsored the only serious annual convention UFOlogy has to offer, the Congress of Scientific UFOlogists (see page five of this issue). AMUFO is again participating in Congress plans for 1966. The Third Annual Congress is planned for Cleveland this coming June, and the drive to "bring out the people" is already in the works. In addition to this program, AMUFO continues to support the UFOlogy union, the United UFOlogical Association (UUA).

.....Not that we've had no problems in the past two years. The biggest has been-oddly enough-our publication, the Review. We say "oddly" because, of the directors of the group, three out of four have had previous publishing experience. Two even still publish independent UFO periodicals; Rick Hilberg's UFO Magazine, and your editor's UFO Sighter. Yet, our publication has suffered delays, misprints, and other ailments. The first issue in March, 1964 was, we think, quite good, but the printing costs were so great that we were placed heavily in debt; a situation since rectified. The second and third issues were - let's face it - just not up to the standards one would expect of a major organ of responsible UFOlogy. We were dismayed, but we are not quitters. You hold in your hand our fourth issue as evidence of our continued resolve to put out a magazine of value; one which will be on the highest intellectual level and of the highest printing standards of excellence. We sincerely hope it meets with your approval.

As with all groups in this fluid field, our future must rest to some extent with the elusive UFOs themselves. Should a solution present itself, our purpose will have been accomplished and we will happily pack our suitcases and move on to other pressing problems of our age. But until that day we will proceed with our work. At present we are working on an idea for an annual UFO research meeting, plus our continuing efforts with the annual Congress and other progressive programs. We think AMUFO is doing something for the UFO field; something that's needed doing for a long time. Prospects are bright and our outlook is optimistic. But we need a lot of help - All we can get. So, we invite you, our members and colleagues, to roll up those sleeves and lend a hand in this great endeavor.

IMPORTANT MEMBERSHIP REVISIONS, AMERICAN UFO COMMITTEE, EFFECTIVE AS OF
JANUARY 1st, 1966

- (1) As of January 1st, 1966, the American UFO Committee Review will begin publishing on a three times a year basis, plus news bulletins as needed. The membership fee of \$2.00 per year will entitle you to six issues of the Review, plus membership card and all standard benefits. This differs from our previous publishing schedule only in frequency of issue; no change has been made in the number of copies you will receive for your membership fee. Issues will tentatively appear each March, June, and September, as have our previous issues (Volume 1, Numbers 1 and 2, and Volume 2, Number 1). We base this on an ostensibly successful similar system used by another major reputable UFO group in recent years. We take this action in the hope that it will improve the quality and assure regular release of our publication.
- (2) The U.S. Post Office Department has announced new regulations governing the mailing of certain publications. Because of this, and because of a need to bring our records fully up to date, we urge all members to renew their memberships before January 1st, and to include their postal zip code with their renewal letters.
- (3) Following the example of the New Jersey Association of Aerial Phenomena and other groups, we are prohibiting from membership in this organization any members of communist or fascist groups. Any membership may be terminated by the directors upon conclusive evidence of such affiliation. We wish to emphasize, however, that beyond this NO RESTRICTIONS WHATSOEVER ARE PLACED ON MEMBERSHIP IN THIS ORGANIZATION.
- (4) The goals and activities shall be as follows, in order of precedence:
- A) Sponsorship and support of the annual Congress of Scientific UFologists.
 - B) Promotion of the UFology field through our publications.
 - C) Public education on unidentified flying objects through our publications, the above mentioned Congress, the United UFological Association and related federations, and personal efforts by the directors (such as radio appearances, etc.).
 - D) Research into individual sighting reports, including sponsorship of at least one annual meeting on UFO research.
- (5) Effective immediately, lifetime memberships in the American UFO Committee are available at \$10.00 which includes all benefits for the duration of the existence of the Committee.
- (6) We wish to reiterate our use of the abbreviation "AMUFO" in preference to the commonly used "AUFOC". Checks, correspondence, etc. should be made out to "AMUFO", not "AUFOC".
- (7) Executive Directorship of AMUFO is vested in Mr. Allen Greenfield, Mr. Rick Hilberg, Mr. Dale Rettig, and Mr. Allan Manak. Mail should be addressed to either AMUFO Editorial-Office, 2875 Sequoyah Drive, N. W., Atlanta, Georgia 30327, or AMUFO Administrative Office, 3403 W. 119th Street, Cleveland, Ohio 44111.
- (8) Personal answers to correspondence may not be given unless specifically requested, due to the volume of mail handled by our small staff. However, we wish to point out that all comments are much appreciated, and we look forward to hearing from our members at any time.

In the years to come the American UFO Committee will continue to work diligently towards a solution to the UFO problem. We sincerely thank you for your continued support towards that admirable goal.

UNIDENTIFIED FLYING OBJECT REPORTS.....SUMMER, 1965

Reports of unidentified flying objects (UFOs) were made in great numbers from many points of the globe during the summer of 1965. Their number was so great, in fact, that Emil R. Sveilis of United Press International stated they were "the most numerous since 1957." ¹

Saturday, July 3rd, 1965: According to an Associated Press account ² a lens shaped UFO was sighted by Chilean and Argentine personnel at two Antarctic bases. A Chilean base commander described the object as being "yellowish red, changing to green, yellow and orange." The Argentine Navy issued a subsequent communique stating that "Argentina's Antarctic base saw the flying object and photographed it." The film, it was learned, could not be developed for eight months, due apparently to the isolated location of the base. The color photos were reportedly taken by an Argentine corporal. Both Argentine and Chilean reports noted interference in electromagnetic apparatus at the time of the sighting. In view for about 20 minutes, the object was moving generally eastward, but at times it went west..... "at some moments, it appeared to hover"..... ³

Saturday, July 3rd, 1965: A large, round, silver ball was spotted by two young boys on the Cole Road in Shelton, Washington. According to a local news report ⁴ the object was about the size of the moon when viewed at night. As the boys moved closer, the object shot straight up in the sky.

Thursday, July 8th, 1965: Two officers of the Sunnyvale, California police force stated they observed a blinking red light for about 10 minutes. They described the object as being much brighter than Venus. It climbed straight up, and moved away to the North. ⁵

Friday, July 9th, 1965: A UFO was observed for approximately 45 minutes at an altitude of 33,000 feet by members of the staff of Santa Maria airport in the Azores. Airport authorities stated that electromagnetic clocks stopped for 10 minutes while the white, cylindrical object was overhead. One plane was sent up to observe the object, but reported no success. ⁶

Saturday, July 10th, 1965: A peasant couple in a village near Oporto, Portugal sighted a pinkish UFO at an altitude of about 3,000 feet. They said they saw the object at about the same time some static appeared on their radio. ⁷

Monday, July 12th, 1965: An object was sighted over Columbus, Ohio in the evening. One person, a science teacher, said he saw the object through a telescope and said it was a balloon. Another witness in a private letter to a UFO organization stated, "I am not yet satisfied with this," in reference to the balloon explanation. ⁸

Friday, July 16th, 1965: Several persons reported sighting UFOs over Buenos Aires, Argentina shortly after sunset. During the period of 15 minutes that the UFO hovered over the city, one of the city's television stations was interrupted because of atmospheric interference. Witnesses described the objects as very bright, emitting colors ranging from reddish greens to blues. The cigar shaped UFOs were also photographed. The object moved away to the northwest towards Uruguay. ⁹

Saturday, July 17th, 1965: A UFO was sighted by numerous persons over the Rio Plata River, between Uruguay and Argentina. One witness described the object as being cigar shaped, reddish in color, and about 10 meters (32 feet) above the river. He stated the object moved upward when he started running toward it, leaving a white vapor trail. Five other persons confirmed the report. ¹⁰

Supplementary Reports

Sunday, August 1st, 1965: Unidentified objects were sighted in at least 8 states, including Kansas, Texas, Oklahoma, New Mexico, Colorado, South Dakota, Nebraska, and Wyoming, throughout the night of August 1-2. Watchers included a number of law enforcement officers. Descriptions of the UFOs ranged from lights of various colors to egg-shaped objects. The USAF explained the reports as the planet Jupiter and a number of stars including Rigel, Capella, Betelgeuse, and Aldebaran. The Director of the Oklahoma Science and Art Foundation Planetarium in Oklahoma City, Robert Risser, stated that the Air Force explanation was "as far from the truth as you can get....Somebody has made a mistake. These stars and planets are on the opposite side of the earth from Oklahoma City at this time of year."¹¹

Monday, August 2nd, 1965: Objects reported over an eight state area showed up on a radar screen at the Wichita Weather Bureau, Wichita, Kansas, early Monday. Ellis Pike, first assistant meteorologist at Wichita was quoted as saying that the blips "looked much the same as an airplane might." The blips tended to brighten and dim intermittently. Pike estimated the object's speed as being about 45 miles per hour.¹² The USAF, however, called the radar returns "temperature inversion",¹³ despite the coinciding visual reports.¹⁴

Monday, August 2nd, 1965: UFO reports in the evening were made in Oklahoma, Texas, and Nebraska. Residents of Justin and Ponder area of north Texas claimed they saw a "flying saucer" land near Texas Highway 156. Investigations by authorities apparently turned up no physical evidence to back up the landing claim.¹⁵

Related Unsubstantiated Accounts and Additional Notes

- 1.) An unconfirmed report relayed to the American UFO Committee states that one sighting in this series of electromagnetic effects/UFO reports resulted in interference with the reception of photo data from the Mariner Space probe.
- 2.) A number of additional sighting reports in the Ohio area have apparently been made. At least one photo of an object or formation of objects was made in Cleveland, Ohio, in a sighting witnessed by a number of individuals.
- 3.) Unsubstantiated reports from Baltimore, Md. and elsewhere throughout the U.S. were apparently announced August 3rd, 1965 on the "Today" program on NBC.
- 4.) According to the Associated Press, Mariner 4 completed transmission of its 21 close up photos of the planet Mars shortly before 9:00 P.M. Monday, August 2nd.

Cape Area Sky Lit by UFOs, Policemen Say

COCOA, Fla. (UPI) — The outbreak of unidentified flying object sightings has spread to the area near the Cape Kennedy Space Center.

Four policemen reported watching strange orange and yellow lights over the city of Cocoa early Wednesday, including four objects that appeared in a diamond formation.

Residents in the central Florida cities of Orlando, Winter Park and Kissimmee also reported watching similar lights dart about in the sky Tuesday night.

John Cormack, a Federal Aviation Agency controller at Herson Airport in Orlando, suggested that the mysterious objects might be reflections of lights from shopping centers on low clouds or that they might be connected with a minuteman Missile launch Tuesday night at Cape Kennedy. The missile, however, was launched one to two hours before the Cocoa policemen made their sightings.

The Air Defense Command Radar Warning Station at nearby Patrick Air Force Base re-reported no strange radar sightings during the night.

Patrolman Edward Schild, dispatched to look for the strange lights when a Cocoa resident reported them to police, said he watched four objects in the sky with binoculars for about 15 minutes. He said they changed position several times and were in a diamond-shaped formation.

Another officer at a different location also reported observing the same objects.

Lt. James C. Wade and Lt. Gene Powers a few minutes later said one of the lights, also yellowish-orange, appeared to hover over the city police station for several minutes and moved away.

Similar sightings have been reported in the midwest and southwest during the past few days.

New Saucer Sightings Stir Up Old Debate

THURSDAY, AUGUST 5, 1965
THE ATLANTA JOURNAL

Objects in sky persist

OKLAHOMA CITY (UPI)—Thousands of persons across the nation's Midlands and Southwest again Tuesday night reported seeing mysterious flashing, winking and sparking phenomena that sped and sometimes zig-zagged across the skies.

The Air Force contends most of the sightings were probably just stars or planets.

Najeeb E. Halaby, former director of the Federal Aviation Agency (FAA) said the rash of reports may signal a new "American mythology."

"Reports of such objects seem to reach their peak in August and September. It may be that the long, hot summer expedites the imagination," he said in Los Angeles.

Most of the objects people saw were described as red or yellowish, and speeding across the sky from southwest to northeast at very high altitudes.

★

It was the fourth consecutive day of UFO sightings, which have harried some police departments so much they have referred all inquiries to Air Force bases.

A lot of people took issue with the Air Force's claim they were stars or planets.

A 23-year-old Souix City, Iowa high school English teacher said he saw a flashing object and that "anyone who would say this is a star would be out of their minds."

What is it?

This is a photo of an unidentified flying object taken by television newsman Bob Campbell in Sherman, Tex. Objects have been reported in Texas, Oklahoma and Nebraska.

WEDNESDAY, AUGUST 4, 1965
THE ATLANTA TIMES

UFOs Reported

FOSSIL — Three cigar-shaped silvery unidentified flying objects were reported one mile south of here Tuesday morning by Bill Wehrli and Steven Lane.

Wehrli said the objects hovered overhead for about two minutes at an estimated 3,500 feet above them. They were about 60 feet long and 12 feet wide, he said.

The incident occurred at about 10 a.m. while the two were loading hay. He said there was no noise from the objects, and no movement. The objects reportedly departed in a south-westerly direction leaving no "vapor-trail" of the type left by jets. The two were apparently the only ones to sight the objects, which they said were in such a position as to be invisible from the town.

EAST OREGONIAN
PENDLETON, OREGON

Saucer Sighted

BUENOS AIRES (UPI) — Argentine sailors at two Antarctic outposts saw a multi-colored "unidentified flying object" dawdling across the sky Saturday, the Navy Department announced Wednesday night.

"The object was disc-shaped and predominantly red and green in color, with occasional flashes of yellow, blue, orange and white. . ." The Navy announcement said.

"It was moving generally eastward, but at times it went west . . . at some moments, it appeared to hover. . ."

"It was in view for 15 to 20 minutes, allowing ample time to photograph it . . . (the object) was seen by members of the naval detachments at Deception and Orcadas."

BAKER DEMOCRAT-HERALD
BAKER, OREGON (CIR. 3,236)
JULY 8, 1965

'IF YOU'RE SMART, YOU'LL GO BACK WHERE YOU CAME FROM!'

'Strange creatures of earth'

Despite Gemini and Mariner and the many accomplishments of American space scientists, the baffling unknown flying saucers are continually turning up.

Since 1947 the Air Force which has the responsibility for investigating UFO (unidentified flying objects), has checked out 9,130 reports.

Of these all but 667 have been satisfactorily explained. But of 222 reports investigated this year, four remain unexplained. A UFO flew alongside a Japanese airliner

sending its instruments "wild."

British and Argentine scientists in Antarctica reported an unknown object which violently affected their geometric instruments and two California policemen reported an object much brighter than Venus which after blinking a red light for 10 minutes climbed straight up, turned north and moved away.

It seems that maybe the little men from another planet are still observing the "strange creatures of earth," and really upon close analysis, they are strange indeed.

'You got some lovely shots of our planet, too!'

1965 UFO Congress: A PHOTO REVIEW

The Congress of Scientific UFOlogists is an event co-sponsored each year by the American UFO Committee and several other groups. It is UFOlogy's only convention for serious enthusiasts and investigators. It can be said of the Congress that it is truly the "UFOlogical event of the year", being attended by interested persons from all across the nation, and around the world. Delegates include the greatest personages in the UFO field. In the following pages, we have attempted to show our readers some of the excitement of this event.
