

# SAUCERS

Vol. I - No. 1

1953

15¢ per copy

## -EDITORIAL-

THIS IS THE long awaited periodical Flying Saucers International had hoped to bring out on flying saucers. We hope to always come out with the truth in "SAUCERS" - we do not believe in sensationalism, although it is much less practised than now believed.

Articles will be found here on not just "flying saucers" - "crystaloids" - or the name we prefer, "Space Visitors" - but on many scientific and philosophical subjects in the future. Our creed and manifesto is TRUTH\* - which can only come through a completely Open Mind.

There is more to flying saucers than just material objects. The saucers' occupants are not "insects," "vegetables," nor, we believe, "little green men." This is a great period. We must make the most of it. The "Space Visitors" are, of course, of interplanetary origin. They are here for a purpose - not just curiosity. They originate from several planets - perhaps even hundreds, thousands, or millions - in our solar system, others, and possibly other galaxies! This may seem impossible now, but the time differential is possible by Einstein's Theory of Relativity.

---

\* "Ye shall know the truth, and the truth shall make you free."  
- St. John 8:32

According to Prof. George Gamow, noted astro-physicist of the George Washington University, the apparent time for a "ship" to come here from the Andromeda galaxy (approximately 680,000 light years away or more according to the recently discovered error in the Universe measurement) traveling about 99% the speed of light (186,000 miles per second) would take three to four hours.

FLYING SAUCERS HAVE already landed on Earth. One authority told us he knew of about thirty such landings. We have one report that says a Russian scientist claims a space ship, thought previously to be a meteor, landed in Siberia about fifty years ago. But the most intriguing incidents to date are the "contacts" over the past few years. They all apparently carry a message from the saucers. That is one reason for this periodical. We are going to bring the message forth. It will take time - but it is worth waiting for. We are by no means limiting ourselves. There is yet to be proven any contact 100% authentic.

Did anyone realize Nostradamus, Astrology, The Pyramids, among other prophetic sources, all predict a "world shaking event" to take place between August 20th to 26th, 1953? This will bear watching. It is believed by many sources to be the "undisputed landing of our 'Space Visitors'."

THE FUTURE OF this periodical, "SAUCERS," is undetermined at present. We are not positive there will be further issues. If it does, and most likely will, continue, we won't know if it will be monthly or sell for 12 pages for 25¢ instead of four for 15¢. Therefore, we can only recommend that you send 50¢ for the next 24 pages or \$1.00 for the next 48. If, for any reason additional copies will not be printed, all money will be refunded.

All correspondence must be addressed to Flying Saucers International, P. O. Box 34, Preuss Station, Los Angeles 35, California. We will try to personally answer your questions, but would appreciate it if they are accompanied by a stamped, self-addressed, return envelope. Thank you.

WE WOULD LIKE to express our deep appreciation to Orfeo Angelucci for his excellent article and to George Adamski for permission to reproduce his photograph.

Yours faithfully,

The Editors

---

#### SHORT SHOTS

THE LOCKHEED STAR (official publication of the Lockheed Aircraft Corp.) of March 19, 1953, had a front page article with this heading: "Mystery Object Sighted By Pilots Over Victorville. - - - MYSTERY OBJECT - By super enlarging, Lockheed's photo dept. salvaged this picture from tiny movie camera print. (The object resembled a half moon.) Film was taken from T-33 at extremely high altitude, but object was too distant for good picture." (Cont.)

---

"SAUCERS" is published by Flying Saucers International, Box 34, Los Angeles 35, Calif. - Max B. Miller, Editor. This is a non-profit organization. Donations accepted.

One pilot described it as follows: "We think it might have been a weather balloon. Except for a couple of little oddities we'd be certain: To be as conspicuous as it was, the thing would have had to be the size of an airplane hanger, as high as it was above us. Another thing that was peculiar was the way it zipped along and then stopped. And it stayed stopped, directly over Victorville, for three hours. It didn't move. We could clearly distinguish its shape. It was roughly oval, rounded on top. It just sparkled in the sunlight - maybe next time we see one, it will be lower. Then we'll find out."

\* \* \*

A FEATURE ARTICLE in the March 8, 1953, St. Louis Post-Dispatch by Peter Wyden, a staff correspondent, was on Project "Bluebook." This article revealed that Capt. Ruppelt (Director) traveled over 100,000 miles to all parts of the world investigating saucers. He even sometimes carried a Geiger counter. "I don't know why to tell the truth," Ruppelt said. They further stated they've never seen a saucer that couldn't be explained away as natural phenomena.

We want to know WHY they travel the amount they do and carry a Geiger counter with them when they supposedly don't even believe in such things as "flying saucers"? Perhaps this explains it: "Another reason why Project Bluebook still exists at the Air Technical Intelligence Center here is that...visitors from outer space may not be with us at the present but could conceivably show up tomorrow." (!!!)

\* \* \*

A PERSON LIVING in Conn. (he will not allow us to release his name) discovered a three foot sphere with a revolving disc inside. The fragments proved to be highly magnetic, he claimed (and we have the photo-stats to prove it), and when analyzed was found to be "Cobalt in its native (free) state" which is not found on this Earth. The metal also contained Iron and Nickel.

This incident brings to light an item in the Spring 1953 "Flying Saucer News" (official journal of the Flying Saucer Club, England) which claims a railway official found fragments of metal from a "swishing, multi-colored, hollow cylinder." They are being examined by Dr. Graham White (member, British Interplanetary Society), reports the Rhodesia Herald - 1:10 a.m., February 8th.

\* \* \*

IT IS RUMORED that Scoutmaster J. D. "Sonny" Desvergers, who was "burned" by a flying saucer in Florida last year, told friends what he wouldn't to the press that he saw "three men inside the disc." The chances are that he was not intentionally "burned" by the saucer, but only by a charge of static electricity.

\* \* \*

THE FLYING SAUCER groups and their officers we are cooperating with are as follows: Joseph Barbieri, Research Director, SAUCER PHENOMENA AND CELESTIAL ENQUIRY; Albert K. Bender, Director, INTERNATIONAL FLYING SAUCER BUREAU; H. H. Fulton, President, CIVILIAN SAUCER INVESTIGATION OF NEW ZEALAND; Richard Hughes, Secretary, FLYING SAUCER CLUB (England); L. T. Whitney, Honorary Secretary, AUSTRALIAN FLYING SAUCER INVESTIGATION COMMITTEE.

\* \* \*

THE FOLLOWING items can be had through our headquarters: "I Rode A Flying Saucer" by George W. Van Tassel, \$1.00; "20th Century Times" (Saucers First Contact Revealed) by Orfeo Angelucci, 25¢; Flying Saucers International reports #1 and #2, 15¢; representative stickers (for reps. only), 500 for \$1.00; and Welcome: "SPACE VISITORS" stickers, 500 for \$1.25.

RECOMENDED READING are the following books and periodicals, though not all are on flying saucers, for a more complete material and spiritual understanding of things we now know so little about: "A Dweller On Two Planets" (starting at book two) by Phyllos; "Saucers First Contact Revealed" (20th Century Times) by Orfeo Angelucci; "He Was Burned By A Flying Saucer" (Desvergers) in the April 1953 "Stag" by George X. Sand, and the April 19, 1953 "American Weekly" by Marta Robinet; "The Saucer and the Monster," January 1953 "Fate," by Gray Barker; "I Rode A Flying Saucer," May 1953 "Action," by Fred Reagan; "Has Life Come Here From Other Worlds?," June 1953 "Man To Man," by Leroy Thorp; "I Rode A Flying Saucer" by George W. Van Tassel; "Despite 2 A-Bombs - I AM STILL ALIVE," June 1953 "Cavalier," by Kenshi Hirota; "How Hellish is the H-BOMB," April 21, 1953 "Look," by William L. Laurence; and the movie "It Came From Outer Space" (Universal International) by Ray Bradbury.

THE BROAD WAY  
(Flying Saucers I Like)

By ORFEO ANGELUGCI

"The chariots shall rage...  
they shall juggle one against  
another in the BROAD WAYS:  
they shall seem like torches,  
they shall run like the  
lightnings." - Nahum 2:4

THE FLYING SAUCERS that have most captured my interest, and which I look upon as the long term substantial ones, are these: Those which appeared to Kenneth Arnold - and continued on to confirm his report. The one which tangled with the late Capt. Thomas Mantell. And the illustrated one of the "Sonny" Desvergers' report. I like the eight which shot toward and then away from the two first officers of a Pan-American Airliner in the southeastern state. Also there are the many that radar finally was "permitted" to register at the same time planes were in their persuit. We have heard enough of these to dispel any doubts.

Then there are those which have appeared as oblong shapes, as discs, as cones, and as arrow affairs, to so many hundreds of witnesses that there is nothing to be said further as to their reality.

I like the pictures of the "fuzzy lights" a coast guard chap snapped and registered. This is so much like one published in the Lockheed Star, which hovered for three hours over Victorville, Calif. In this class comes the photograph taken by August C. Roberts, a Civil Defense observer, over Jersey City. This is a real beauty, a throwback to the "double-star" effect of the universe, giving the appearance of a cacoon, or a whole peanut in its shell. This could very well have been two discs synchronized to produce the effect.

We like all flying saucers, in fact. Especially the ones that have brought thousands of thinkers to some peculiar realization of what is occurring. Yes, our visitors are preparing us for the big day. I have seen enough of them to be convinced beyond any shadow of doubt. May I, and you, and you, see many, many more.
