NEW MEETING PLACE FOR FORUM DIVISION

The Phoenix Church of Divine Truth at 3223 North 24th Street, in Phoenix, (1/4 block south of Osborn Road) has been designated by Russell Cloud, S. R. A. President, as the permanent meeting place for the Forum Division. All regular meetings are held on the third Friday of each month at 8:00 P. M.

At the September meeting, to be held Friday, September 18, a program will follow the business meeting. However, plans for the program have not been completed as this issue goes to press.

It will not be necessary for members to bring chairs as the hall will be fully equipped with the necessary furnishings.

"KINSHIP WITH ALL LIFE" REVIEWED

By Dorothy Miller

An interesting evening was spent by S. R. A. Forum members at the home of Agnes Sanborn, 1516 East Hood Avenue, Sunnyslope, on August 21 at the regular monthly meeting. Following the short business meeting, Betty Eilers gave a review of the book, "Kinship With All Life," by J. Allen Boone, and also related some of her experiences with small animals and their care. A tape recording of Theosophical teachings on reincarnation was presented, and a musical recording from Howard Menger was played, the music portraying Menger's impressions of space music he had heard at various times and in various places.

An announcement was made that Dr. George H. Williamson's book, "Road To The Sky," will be available from the English press some time this fall. Members who desire the book may order in advance through Russell Cloud or the Librarian, Gladys van Derslice.

DR. KELSEY TALKS ON SPACECRAFT

The Spacecraft Research Association was invited to send a member to Tempe to the Kiwanis Club luncheon late in August to describe the activities of our organization and to discuss the subject of UFO's generally. Dr. Don Kelsey, Minister of the Phoenix Church of Divine Truth, was selected by the President, Russell Cloud, to address the group.

As a gesture of gratitude toward Dr. Kelsey for making the talk, he and Mrs. Kelsey were presented with S. R. A. honorary membership cards.

12 YEARS OF FLYING SAUCERS, . . . WHAT NEXT?

By John McCoy

(Author of "They Shall Be Gathered Together"

"Soarings of the Eagle," and

co-author of "UFO's Confidential.")

(The following is reprinted from "Flying Saucer Review," 1 Doughty Street, London, W.C. 1, England, published bi-monthly, \$3.75 per year.)

For twelve years now, we have lived with the unidentified flying objects. Slowly, but surely, the public throughout the world has come to regard them in a serious light. The concept of visitors from outer space is certainly not so remote or unlikely to the average person as it was in 1947. However, it is not only interest in UFOs that has grown over the years, but also in many other subjects. Those individuals who first became enamoured with the mystery of spacecraft from other worlds are now branching into the new theories making revolutionary changes in archaeology, anthropology, physics, and psychology. They are looking to the past to discover that man's place in the scheme of things on this planet is rather different from that previously supposed by the more narrow elements of archaeology and anthropology. The discovery of the Oreopithecus Man in Italy pushes man back to an age of twelve million years or more. This means that cultures of much greater technological advancement than ever before imagined may sleep beneath the polar ice or behind the "green hell" of some unexplored jungle region.

All in all, the interests of the public seem to be spurred on by a recognition that the materialism of modern, mechanised, money-oriented society is not enough to satisfy the inner nature of man. During the Dark Ages, a tremendous burden of fantastic superstition and fear was placed as a control mechanism upon the people by the Church. Matters of metaphysics, occultism, extra-sensory perception, psychism, spiritual powers, and the like were perverted to the ends of Rome, and so abused and debased that when the light of the "Re-birth" shone out, anything pertaining to these matters was swept aside, whether it was truth or falsity. The rising tide of the new science held nothing but disdain for the Church which had bound it to a dogma set at controlling the free thought of man, even to the extent of denying proven scientific fact and forcing "scientists" to "recant." Thus it was that a great wave of materiality swept over the world as scientific enlightenment came. The Church, ever ready to adapt itself to changing conditions, even became more "material" in its approach. Extra-sensory perception, the basic nature of man, "spiritual powers" and all psychic phenomena were relegated to the trash heap as through the years science progressed to the pinnacle of dogma from which it had displaced the Church.

During the period after 1850 the era of materialistic thought was at its peak. Darwin contributed much to the idea that man was his body and that "mind" was somehow a product of the brain. To the scientist or informed

intellectual of the day consciousness or awareness was simply an afterglow from energised brain cells. Something, however, happened in the late 1800's to change this trend. Dr. G. H. Williamson says in his book "Other Tongues-- Other Flesh" that a great influx of outer space influence took place at this time. No matter from where the influence came, it was certainly felt. Almost overnight, historically speaking, all the things which had so roughly been abandoned by science began to be examined by the more intelligent and far-sighted investigators. Man begins once more to quest for the full realisation of his ultimate nature and its expression in the physical world.

Today, these ideas do not have the full approval of science or the public, but all mankind has realised to one extent or another that materialism is not the answer to earth's problems, and that the answer does lie somewhere in the realm of an understanding of Man's own true and basic nature. The trend away from materialism is now being felt in every field of study. As we mentioned, archaeology is being transformed. Psychology is being shaken to its roots. Physics cannot maintain the pace set by brilliant young scientists. Religion itself has undergone remarkable revision. Thousands have become receptive to the non-materialistic concept of life. Such great literary figures as Aldous Huxley have spoken out about saucers and against the growing materialism of the day. His new book, "Brave New World Revisited," is an absolute must. By many means is the public mind being prepared for new thought and new ways of living.

I believe that this is the prime purpose for the appearance of the space ships. They symbolize the new era into which we are entering. Doubtless, they perform many other tasks, but, to me, the most important is the signaling of the rebirth which is approaching.

Indeed, man on this planet must achieve a new birth. He has polluted his body with poisoned and lifeless food, not to mention atomic fallout. He has poisoned his mind with tawdry and materialistic thoughts, focusing his attention and setting the standard of his values upon material wealth. He has forgotten and even fought his spiritual heritage and brotherhood with all men. Yet today the tide is turned against the destructive concepts of materiality. The people cry for peace, while the world leaders speak about and prepare for war. The planet and its people have reached a point of decision. Slowly, but surely, we are forced to evolve our patterns of living. Our horizons are being widened, and we must find a new way or find destruction in outmoded "theory" and organisation.

What are we UFO enthusiasts to do in the face of all of this? We must avoid becoming a narrow cult in a time which demands such broadness. There are some persons who cannot tolerate anything but an objective study of sightings of UFO and not even extremely sensational ones at that. There are also those who go about intolerant of objective research, unable to see anything but the numberless contact stories, so called. There are those who go about telling us what the space people say. Indeed, it is an interesting message that they bring, which conforms to the pattern of the truth and

knowledge which has been discovered on earth already. They confirm and repeat it. However, when earth people repeat and repeat and repeat once more, the obvious, not to mention personal pet inanities, the UFO groups look like fugitives from lunatic asylums. If the space people are as insipid as some indicate by their rather naive and unreal stories, then woe be unto the space people. The point is that we must find the stable middle ground in UFO research where the most objective and well-informed investigators may examine with scientific profit the wildest of claims and experiences.

To do this requires a broad and plastic background in all phases of life and knowledge. UFO's are not so important in themselves, but in what they symbolise - the changes which are about to take place on earth. Our truest course will be to prepare ourselves as well as possible to see to it that the proper changes take place at the proper time. Neither the space people, God, nor any other "supernatural" source is going to hand to earth on a silver platter its new discoveries in science, technology, philosophy, politics, or religion. Indeed, it is we, the avant-garde, who are responsible to a great extent for these discoveries.

Let us not limit ourselves to flying saucers or to any set group of subjects. According to eastern philosophy, Truth is elusive and cannot be contained. Therefore, to find it, we must be as broad and infinite as is Truth itself. Do not forget the UFO's, but do not hesitate to take the next step into the fresh new land of discovery. And do not forget that the age of guesswork and bias is over. No "cause" or group will bring "truth" to the world. All men working together sanely and objectively will bring about freedom. In the past we learned that unproven theory and pure belief brought about the enslavement of men's minds. Let us not forget that the theory which cannot be proven is no longer worth believing. Many years ago there was such a scarcity of knowledge and understanding that almost anything was acceptable. However, today there is no such scarcity. We must carefully pick and choose that which is workable truth.

The condition of the earth at the moment is reminiscent of the Biblical prophecy of the great harvest and the few workers. There is a great deal to be done in ushering in the many changes and advances in so many varied fields. There are very few people to perform these tasks. Thus it is that this situation places the UFO researchers in a position where they may broaden their field of endeavour, as many are doing, and aid at this critical point in the cultural evolution of earth. I do not foresee that the UFO researchers will fall down on a job which I believe they were meant to perform.

MYSTERY LIGHTS SEEN OVER BRITAIN

✓ London (AP)--Airline pilots, coast guard groups, and ordinary stargazers last night reported seeing mysterious vivid green lights in the sky over southern England. (The Arizona Republic, Sept. 6, 1959.)

---Contributed

DR. G. H. WILLIAMSON PRESENTS TWO LECTURES

By Dorothy Miller

A large crowd was present to hear Dr. George H. Williamson give his anticipated lecture on "The City That Was Before the Moon" at Odd Fellows Hall on August 21.

Dr. Williamson's pictures were all new and showed places he had visited in South America that gave evidence of a great civilization that predated the Inca or Mayan civilizations. The great stones of this early civilization still stand and are fitted exactly to each other, so exactly a piece of paper cannot be slipped between them. These great blocks of stone weigh tons and show evidence of a superior technology that could have done such fantastic things. Some great boulders were hollowed out into many rooms with staircases and niches - a whole city within a great rock. Many of these structures showed evidence of glaciation over the surface, evidence in itself that they existed long before the Incas or Mayans ever came to this land. Dr. Williamson's lecture and slides were also descriptive of Indian tribes now living in this area, some of whom closely follow ancient rituals and symbolism usually associated with Oriental people of Asia. Their ritual dances, the dragons, the costumes seem to have been transplanted almost literally from the remote parts of China or Tibet. It is believed that the root stock of these isolated tribes may indeed have migrated from the Far East before any time that we know.

The following evening Dr. Williamson met and talked with the Forum group of S. R. A. at the home of the Clouds, 538 East Belmont, Phoenix. He further developed his theme of the previous night and also told of a group of Italian professors with whom he had worked in Italy. These men have closely documented all sightings and contacts within their experience and are now daring to prepare for publication some of this material. They had previously feared for their professional standing but have decided they must reveal their knowledge to the world. Dr. Williamson talked at length and freely during the evening, which made it a memorable occasion for his listeners.

NEW WORKSHOP IN COLOR AND LIGHT OPENS

Bill Rawlinson, editor of "Celestial News" and a student of the Swedenborg teachings, has opened a new workshop at his residence at 2627 North Central Ave., Phoenix. We reprint the following from the July, 1959, issue of his publication:

"Starting Sept. 1 at C. N.'s address, a workshop in the abstract art of light will be in operation. The true theory of this art comes from the Writings, and will copy on earth the heavenly art of making 'representatives' by means of light forms with color and motion. Queries welcome."

Mrs. Scientist: "Darling, what a lovely moon!"

Mr. Scientist: "For Heaven's sake, let's not talk shop!"

---from "Saucers, Space & Science"

OFFENDERS AGAINST PEACE

(The following article is reprinted from the January-February, 1957, issue of "Round Robin," published by Borderland Sciences Research Association, 3524 Adams Ave., San Diego 16, California. We feel that this article is as timely today as when it was originally written and published in "Le Courier Interplanetaire.")

Experiments detrimental to the whole human race are going on, in spite of the protests of the universal conscience. We have no need to wait for a third world war, a thermo-nuclear one; for war against life, against the whole life of our planet had already been declared by men in 1945. It has not ceased, ever since then, to spread its ravages.

Let us consider the matter again, after all that has already been written on the subject:

Professor Sturtevant, of the Institute of Technology of California, has established the fact that about one million eight hundred thousand children out of the nine hundred and ten millions of our planet are already showing signs of changes which could be attributed to nuclear explosions. These "variations" could be translated in the course of several generations into deformities (children with six fingers, club feet, etc.), organic lesions (diabetes) or abnormalities.

The radio has produced evidence of radioactive rains by means of which a considerable quantity of radioactive vegetables have become unfit for consumption.

Prof. Lassagne, honorary director of the Radium Institute in Paris, wrote in "Le Monde," of September 7, 1955, as follows: "Carried away into the atmosphere, this radioactive dust which represents a radioactive-equivalent of hundreds of thousands of tons of radium, could fall, according to the prevailing atmospheric conditions, whether in the form of ashes or of rains, upon territories situated several thousands of kilometers away from the site of the explosion. No possible protection could be devised against the contamination of living creatures in regions so powdered or so watered. The radio elements would inevitably penetrate into every human organ. Such a radioactive rain fell over the south of the Japanese archipelago some days after the explosion of March 1, 1954. A general contamination was established in this region. Radioactivity was discovered in the urine of the population (more concentrated in that of young children), in plants, in the milk of cows, etc. After the explosions of Bikini, radioactive fish were caught several thousand kilometers away."

"One milligram of radium is sufficient to kill an individual," so we are told by Prof. Teller, head of American nuclear manufacture.

The Bavarian Minister of Agriculture has revealed (May 24, 1955) that the radioactivity contained in the rains of June and December was such as to comprise a certain danger. This news caused a sensation among the population (according to the "France-Soir" of Bonn). One of those retrospective revela-

tions which they are kind enough to dish out to us!

From the AFP of May 27, 1956:--"The skipper of a Japanese fishing boat has suddenly become ill, and it is feared that he may be suffering from the effects of atomic radiation following upon the explosion of the H-bomb of May 27th, last. The boat was working, however, a good distance away from the danger zone, as marked out before the explosion. The eruption which broke out over the whole body of the sailor is considered as symptomatic of atomic maladies."

The first submarine explosion took place at Bikini, 1946. The second (to speak only of American ones; the Russians have kept quiet about theirs), was exploded on May 18, 1955, off the coast of California. Each of these was equivalent to five thousand tons of T. N. T. It is known that no means exist of preventing the contamination of edible fish, even when the bombs are launched far away from the fishing areas and maritime routes (Prof. Fontaine).

Before his death, Prof. Debierne, who was Director of the Radium Institute, thus described what he called the gradual poisoning of our atmosphere: "A bomb of 50 kilos produces 50,000 tons of nitric acid. One charge of 50 kilos produces 50,000 tons of nitric acid. One charge of 50 kilos can induce in the atmosphere enough centres of condensation to give an average concentration of 25 millions per cubic centimetre in a layer of forty kilometres depth over the whole surface of the earth. These centers could persist for years before being eliminated."

Well, the first hydrogen bomb had a power of five million tons of T. N. T. and the last, a power of fifty million tons! After the explosion of the Russian bomb in 1955, an increase of radioactivity in the atmosphere was observed on all sides. The Observatory of Fukacaa in Japan declared that rain-water, falling afterward in the south of Japan, contained 28,000 Geiger units per litre and per minute. The Japanese Ministry of Health had stated not long before that life was actually in danger in the middle of an atmosphere of more than 100 Geiger units!

On December 21, 1954, Dr. Leyton, of London, reported a dangerous increase in cases of migraine due to electric charges produced in the atmosphere by atomic and thermo-nuclear bombs; and in India in 1955, a "strange malady" was under observation, believed to be due to H-bomb explosions. We are in a good position, actually, at the AMI, to know and to affirm, that a large number of people have been attacked by dangerous radiations, producing various troubles, particularly, sterility or even death without warning. In 1955 radioactivity at Chicago was increased by 100%. On the 10th of February, 1955, a red tide killed millions of fish on the coast of Trinidad. Radioactive rain and snow have fallen on several large towns, amongst others.

The percentage of "mongol" idiots born at Hiroshima and Nagasaki is eight times greater than normal. Besides this, many monsters have already been born in Japan. Doctors have destroyed them, so that the public should not be informed, and scientists have coldly studied, scrutinized and dissected them. (Information comes from the Brotherhood of Faith, Ontario. Also confirmed by member of Society of Metaphysicians, Ltd., who was an assistant at such post-mortem operations.)

Dr. Harold Pambelbon, well known American scientist (atomic) and naturalist, was able to show, two months ago, to his colleagues of Ogden (Utah), mosquitoes of the size of dangerous hornets, peacock butterflies scarcely out of their chrysalises but as large as tom-tits, and two gigantic insects which he had captured in his neighborhood with the aid of a butterfly net. "At first," said Dr. Pambelbon to representatives of the Press, "I thought that radioactive rays produce results only in the course of several generations, but I know now that the same sample tissue from an egg can, if it is submitted to radiations which would be dangerous to man, and if it is maintained in a constant temperature of 30⁰ centigrade, becomes in several months the monster which you have under your eyes."

The greatest biologists and geneticians admit that the domain of perturbations caused in the human organism by atomic radiation is far from being fully explored - "It will not be, perhaps, for another half century." However, enough is known to have it said, in the corridors of the Atomic Conference in Geneva, that this is a "disagreeable subject, for it contained the risk of spreading panic amongst the crowds of people who understood nothing about it." (Revelation by Charles-Noel Martin in the "Figaro Litteraire" of April 28, 1956.) "What we find awkward about this affair is public opinion, but public opinion can be moulded; it is for us to make it clear that after all, every step forward in progress carries its inconveniences, and that a little radioactivity spread throughout the immense world cannot cause much harm." Yes, that is what is being whispered behind the fine facade of "Atoms for Peace"!

Professor Axel Hellenborg, chief of Swedish meteorology, considers that atomic explosions charge the atmospheric currents with centres of ice. "The North Pole is today 18% heavier than the South Pole. The result of this phenomenon could be the upsetting of the equilibrium of our planet." It is not I who have said it this time!

"The progressive ignition of the atmosphere is now a possibility capable of producing total atomic destruction." (J. J. Williamson, President of the Society of Metaphysicians, who has, alas, reason for saying that cataclysm has begun.)

The cause is easily understood. We are in the presence of CRIME AGAINST THE LIFE OF THE PLANET, crimes which have been going on for eleven years. The Russian, American and English leaders responsible for these ignoble enterprises are acting without concern for the common welfare. The only "extenuating circumstance" for the Americans is that of having always announced their evil intent. The only "extenuating circumstances" for the Russians is that of having proposed, several times, and again quite lately at the last session of their Disarmament Commission, the suppression of the H-bomb experiments (and this act is in the shadow of bad motives.). The American and English once again refused such action: No doubt due to knowledge of ill-motive. The English are aggravating their case by preparing for next year, experiments on the first British H-bomb,

* * * * *

The issue of "Le Courrier Planetaire" quoted above includes an open letter to President Eisenhower, part of which reads as follows:

"One hundred experts on atomic questions grouped under the aegis of the National Academy of Sciences have recently published a report, of which the conclusion follows: Atomic radiations are putting the whole human race in peril. The pursuit of thermo-nuclear experiments is capable of rendering the earth uninhabitable. One million 800 thousand children are already showing signs of changes which could be attributed to nuclear explosions....Vegetables, fruit, fish have been shown to be radioactive. Birds die suddenly. Monsters have been born in Japan....A new malady has appeared in Salsburg.... The north pole is today 18% heavier than the south....Igrition of the atmosphere is now a possibility...."

MOUNT BALDY "CHARGED" BY GEORGE KING

A letter has been received by Pat French from George King, of England, who is currently lecturing in the United States. Several of our members heard Mr. King address a group at the recent AFSCA Convention in Los Angeles. Following are some excerpts from the letter which we thought might be found interesting:

".... This last week has been hectic indeed. I was used as the channel through which Mount Baldy (40 miles from L.A.) was charged as a Holy Mountain on Sunday 9 Aug. Then I gave lectures on Tuesday and Wednesday and had our big meeting in L.A. on Friday. This was a roaring success. We had about 320 people in the hall and had to turn many away because we were packed out. On Saturday I lectured at Pasadena, then last Sunday led the first pilgrimage up the Holy Mountain.

"Over 100 people turned up. Some of these folks were over 60 yet they climbed to the top, which is 9,552 feet high! They all agreed that they felt a tremendous energy when we held a Blessing Service on the top.

"Tomorrow, Wednesday, I am holding another large meeting in L.A. because the Space People wish to make their second transmission in America! Keith and I have been on the radio and T.V. a few times lately and a lot of interest has been aroused in L.A. about our mission.

"It was a wonderful sight to see all the people climbing to the mountain top! One man was over 70 years of age. He said that he was so filled with Spiritual Power that he could climb this even though normally he was a bad walker!..."

THE "SPACECRAFTER" IS INTENDED TO BE AN EXPRESSION OF S.R.A. MEMBERS. SEND IN YOUR ARTICLES, OPINIONS, ETC., TODAY.

A MESSAGE FROM ETHERIA

To our Brother Earthians:

Your Etherian Brothers again extend their greetings to you who are gaining in understanding and who seek to aid in the evolution of mankind and of your beautiful Planet. We come to give you a message which we hope will increase your working knowledge of the forces which are manifesting at this time. Suffice it to say that while the forces which are wielded by our dark brothers are mighty, yet the Forces of Light are even stronger and anon will overcome the tumult which is prevalent on Planet Earth.

But that is for the future. It is of today which we must speak and of the nearer tomorrows in which you must learn how to gain the understanding necessary to combat the situations which arise on every hand. Some of you have devised plans by which you feel much can be accomplished - in effect, you would "take the bull by the horns." My Brothers, I can only say that the time is not yet for your collective physical participation in the offensive.

You who are saddened by the manifestation of misery and unhappiness which you see about you, the blackness which lurks in so many hearts, must first learn patience. Think you that unless you are in a position to get the proper perspective in this unlovely picture that you can judge rightly? Did not the great Master who came to you 2,000 years ago command that you judge not? Think on these things.

Darkness appears on all sides. You sense intrigue, hatred, falsification, and you are weary of body and mind because oftentimes the Light would appear to be hidden. You feel you are trapped in a world of negativity and you chafe against the chains that bind you. You long to strike out against those forces which you know are leading mankind headlong into chaos. You desire to express yourself in physical action. But again, ponder a little.

You know that thoughts precede words and words precede action. You have also learned the power of thought. There is an axiom that you must learn to walk before you can run. Apply this here. Then again, think on the many examples you have known when by first using your mind faculties you were able to avoid needless physical exhaustion. Would you prefer to strike out blindly with physical force rather than utilize the greater powers of the mind?

We, your Elder Brothers, are completely aware of the situation which exists on Planet Earth today. In most instances we probably are more cognizant than you who are in its midst for by means of a different perspective we can evaluate conditions more accurately than you who are in the midst of the destructive web and "cannot see the forest for the trees." From the air a pilot can see two cars which may meet and collide, yet each driver has no knowledge of the other's existence.

We therefore plead with you that you take not physical action which may cause you to become even more enmeshed in the web of negativity which surrounds Planet Earth. Rather we ask that you keep loving thoughts in your hearts and

through that love demonstrate the Light that resides within. In so doing you rise above the irksome occurrences of everyday life, and by conquering the little things you gain additional strength with which to conquer the greater.

Each person who so controls his thoughts and emotions and is guided by that Inner Light can affect the lives of a thousand others. Thus the strength of Light is multiplied. Guard yourself well that you may express only the Light. And know you not what a kind word and a helping hand will avail? The love which you send forth in all its positivity is increased a thousandfold when blended with like love from another heart. Is not this a great weapon for use in counter-action of negative conditions?

The day will come when you will be called forth to join the Legion of Light. Prepare yourself for that day. Be active, yes, but on a plane where your efforts will work to greater avail. The day is not far hence when skilled workers will be needed and most of you will recognize the call. Then come forth with the greater powers which you will have learned and use them advantageously.

Most of you are aware that the days in which you live are those "Latter Days" which are spoken of in your Holy Book. As you watch the tidings concerning upheavals of the earth, tornadoes, floods and other events which you term disasters, you recognize that these are truly the portents and that the greater upheavals will follow comparatively shortly. Think on these things also and determine if you are ready for what must come. Earth is in the throes of a great change. Within the next months old landmarks will disappear. You will hear of even more disasters. Yet, this is a part of the Plan - a Plan which has been enacted many times during the life of Earth. Search within yourselves and be prepared.

May you ever dwell in Harmony and Love, with your footsteps guided toward the Light.

-----Your Etherian Brothers,

-----Telepathic Communication recived by
Franky G. Miller

U.S. AIR FORCE CHIEF ON COMMUNICATION
WITH ADVANCED RACES

Washington, April 14 (UPI) - Major General Donald J. Keirn, Chief of U.S. Nuclear-engine programme stressed prospect of communicating with other worlds as important reason for establishing a moon base or space station. He said AF had no proof that intelligent beings existed elsewhere, but the UFO reports had "emphasized our innate curiosity." He went on, "it is entirely possible that some of them may have passed through our stage of evolution, and may have already achieved a higher level of social and technological culture than our own."

-----Reprinted from "Flying Saucer Review"

AN OPEN LETTER TO FORUM MEMBERS
FROM VICE PRESIDENT MYERS

Dear Members:

It has been brought to my attention that a number of our Forum members are unhappy with our new meeting place. When I first heard comments to this effect, I just passed it off. However, it has been brought to my attention several times.

The dissatisfaction stems from the fact that the individuals are afraid that we will be connected with Dr. Kelsey's Church. Since I was not present when the decision was made in regard to this meeting place I can take no credit for it, pro or con. However, since the decision has been made, I am in favor of it for this reason: From a purely business point of view, it is the best deal we have been afforded - as far as I know.

I have observed that about 90% of our Forum members are interested in one or more of the New Thought religions, and the objectors are mainly from the other New Thought Churches. You people have a point there, but let me assure you that our organization has no intention of affiliating ourselves with any church and I will oppose any action directed that way.

I will say that Dr. Kelsey, in starting his own church, The Phoenix Church of Divine Truth, has pulled away a number of our members from other churches because he believes in Flying Saucers and openly states this fact. Since he is not attached to any home office which dictates policies to him, he can say what he likes in his sermons. I happen to know that most of the other New Thought religious teachers in Phoenix also believe in spacecraft but they cannot say so in their sermons because of home office policy. This is unfortunate but it seems to be "the way the ball bounces."

I repeat, we are not endorsing any church. If Dr. Kelsey takes away some of the members of other churches, let us not be concerned. Each individual has free choice. Everyone can go to church where he wishes. Let us concentrate our thoughts on Love, Peace, Harmony, and World Enlightenment rather than starting any strife within our organization. If you are displeased, pray for right action.

The question might be asked: Do any of you that are displeased have a better idea for a meeting place? If you have, please let us know. If not, be satisfied!

Sincerely,

Jack R. Myers.

A reporter who saw a saucer land, interviewed the 18" creature from the cosmos. "Where are you from?" asked the reporter. "I'm sorry," replied the little men, "space does not permit me to answer."

REPORT ON 2ND NORTHERN CALIFORNIA SPACECRAFT CONVENTION

By Ray E. Barnes

The Second Northern California Spacecraft Convention, which was sponsored by a group of ten spacecraft study clubs, opened on schedule Saturday, September 5, at the Alameda County Fair Grounds, Pleasanton, California, near Sacramento. While at no time was the auditorium overcrowded, there was a good turnout each day with a total registered attendance of 2,500 people.

The orderly and businesslike manner in which all events were conducted is truly a credit to those sponsoring and managing the Convention.

On Saturday both Buck Nelson and Gloria Lee gave highly informative and inspirational lectures which the people acknowledged with prolonged applause. Two motion pictures shown by June and Ron Ormond gave visual evidence of the craft now being seen in our skies. The second picture, a cartoon produced in Germany under the supervision of the scientist, Braun, illustrated the use and operation of a satellite space station in orbit around our earth.

The show got off to a slow start Sunday, but the tempo increased as the day progressed with Orfeo Angelucci, Reinhold Schmidt and Otis Carr putting it in full swing with messages of spiritual and material progress. However, Jimmy Valesquez seemed to steal the spotlight with his recounting of his experience with Space Brothers in determining, "Where is God."

George King closed the evening session with a lengthy message from his Aetherius contact, apparently beamed through Mr. King while he was in a state of trance. The voice beamed through George King, while having a modified British accent and a touch of George's own vocal tones, seemed to have a slight tang of the mechanical as if it had been recorded and then beamed through him by some mechanical or electronic device similar to the explanation given by Dr. George H. Williamson in his private lecture at Phoenix.

The Convention was a success in all respects, both in attendance and in the exchange and dissemination of information of both material and spiritual essence. With its closing all felt the NEW AGE has stepped ahead another pace.

UFO SEEN - STRANGE SIGNALS HEARD ON CAR RADIO

Feb. 25, Jim Hobbs, Jr., 37, an engineering firm employee at Hobbs, New Mexico, reported to authorities and the press that on Feb. 25 he was driving south of Hobbs on State Route 18. He saw a glowing egg-shaped object and at the same time heard signals on his car radio. When he first saw the object it was 8:45 A. M., and he was tuning in his car radio. The interference, which ceased when the object disappeared, was a steady succession of two dots and a dash.

THE ANTIQUITY OF THE ETHER CONCEPT

By C.F. Kraft

The existence of a single universal substrate for all different substances has been vaguely suggested in the Homeric poems, dating as far back as the ninth century, B. C., in which doubt was expressed as to whether there were really as many different kinds of matter as the endless variety of substances that we find in nature. In the Homeric poems, and also in the subsequent teachings of Thales during the sixth century, B. C., water was considered to be the universal substrate from which all other substances were produced. Although water is definitely not the ether, still the underlying thought of having a universal substrate is almost as old as recorded history itself, and it is therefore not surprising that the relativists have not been successful in their efforts to abolish the ether.

A closer approach to the modern ether theory was made by Anaximander (611-547 B. C.), a pupil and successor of Thales. Anaximander did not recognize water as the primary substance, but postulated a substrate, namely, the "Infinite," which he described as being more rarefied than air and different from any of the elements, but from which all elements (namely, air, water, fire and earth) were produced, and to which these elements would return when destroyed.

Anaximander's Infinite was commented on by Aristotle with the remark that "it is not necessary to prove that the Infinite should actually be matter that sense can perceive," and similarly we are today told of the ether that it is not a form of matter that we can perceive, but is nevertheless the source of all subatomic particles of which matter is composed. Anaximander declared that the Infinite is in perpetual motion, and that if its motion ever ceased, the world would also cease to exist. This is nothing else than a paraphrased version of the modern ether theory with its vortex protons, electrons and neutrons which owe their very existence to their motion.

The Infinite of Anaximander, like the ether of today, was without any beginning in time or any limit in space. Thales did speak of the eternity of water, but seemed to think that there was a time when no world existed. It was Anaximander who for the first time definitely abandoned the idea of a world with a beginning in time. According to Anaximander, nothing was permanent except the Infinite, which was the source of all matter and all motion. A more sublime concept of the world has not yet been presented, unless it be the modern ether vortex theory. The later Greeks with their more detailed cosmology strayed farther from the truth.

The immediate successor of Anaximander was Anaximenes (588-542 B. C.), who was soon followed by Heraclitus (535-475 B. C.) with his "Fiery Ether" or "Divine Fire" as the ultimate substance which seems to have meant about the same as lightning and which was first changed into warm air, then into moisture, and finally into earth, only to be transformed again into the original "Fiery Ether" by a continuous cyclic process.

The term "ether" does not occur in any of the surviving works of Heraclitus, but with the role that he assigned to fire, it would seem permissible to

interpret his "fire" as the ether of today. Thus, according to Hippolytus, Heraclitus interpreted fire as the soul. Also, according to Aetius, Heraclitus called the soul a "fiery substance." This fiery soul was further interpreted by Heraclitus as the world-ruling wisdom, and was sometimes symbolized as Zeus or the Deity which directs all things. By interpreting the ether on the one hand as primitive matter, and on the other hand as divine intelligence, Heraclitus laid the basis for both panpsychism and pantheism, both of which have survived in one form or another until the present day.

"INTERNATIONAL WORLD DAY FOR ANIMALS" TO BE OBSERVED
SUNDAY, OCTOBER 4

Dr. Don Kelsey, Minister-Founder of the Phoenix Church of Divine Truth, 3223 North 24th Street (1/4 block south of Osborn Road) in Phoenix, has invited the members of Spacecraft Research Association to attend the services to be held on Sunday, October 4, in cooperation with the World League Against Vivisection and For Protection of Animals in observing "World Day For Animals." October 4 is the day which has been dedicated to St. Francis of Assisi.

At the 11 A. M. service, Dr. Kelsey's subject will be "The Greatest of These is Love," and he will dedicate the Prayer Garden in which will be placed a statue of St. Francis of Assisi, housed by a redwood shrine, together with a bird bath in pottery.

The evening service, scheduled for 6:30 P. M., will feature a potluck dinner for families, their children and their guests, to be followed by a special film, "Wild Life of Africa," personally photographed by the eminent nutritional scientist-lecturer, Martin Pretorius, and narrated by him.

It has been suggested by Dr. Kelsey that you invite all your veterinarian friends, dog and cat breeders, horse breeders or associations, and bird lovers to attend this services which are dedicated to all animal and bird life. The "World Day for Animals" will include "kindness to all."

* * * * *

The Animals' Crusaders of Arizona, Inc., is holding a rummage sale at 2309 Westward Boulevard in Phoenix on Saturday, October 10. Anyone who wishes to contribute rummage for this worthy cause is requested to contact Betty Eilers, 2138 East Garfield, Phoenix. Telephone: AL 2-0485

PHILOSOPHERS AND PHILOSOPHY

By Betty Eilers

A great Teacher once said, "Let every man prove his own work." How many of us do this? How many of us are proud of the work that we do? How many of us really are giving our all in the service of ALL LIFE? How many of us are sincere - really sincere - and how many are fraudulent? When was the last time we looked deep into our hearts and communed with our Higher Selves, seeking the soul-satisfying "at-one-ment" with the only GOD we shall ever know?

These thoughts come to mind as we note some writings now on the market. While our study and research into UFO's is of prime interest in our group, we cannot divorce ourselves from other facets of Life. As a part of the ONE LIFE, each of us is responsible to our co-existent fellow beings (not excluding our brothers of the mineral, vegetable and animal races) as well as ourselves for what we do, say, write, think, and otherwise broadcast. The Karmic law is changeless - we shall reap what we sow - no more and no less.

The word "philosopher" seems to be gravely over-used of late. Anyone who opens his mouth or raises his pen and presents portions of old truths to an inquiring public is often called a philosopher. Those who read all materials and then assume a mien of constant attunement with Nature, regardless of personal habits, are frequently called philosophers. Few are called philosophers today if they earn an honest living, yet others who float from one hand-out to another are given that title. Some "philosophers" are young in years and others are old. Many true philosophers forget their natural gifts and look with awe on those who practice good human relations by placing a monetary value on themselves and the "philosophy" they are presenting to the people.

Since we know that TRUTH and SINCERITY and LOVE - attributes already a part of the living standards of animals, especially dogs - are to be developed if we are to have communication with Higher Beings from Outer Space, it behooves us to watch closely which "philosopher" and "philosophy" we accept for our very own,

Can a teaching whose founder belongs to a sect that "abominates dogs and pigs" be acceptable to the student of TRUTH who knows that ALL LIFE IS ONE and that to abominate another is to abominate himself? And what of the "philosophy" that tells us that we should not have pets nor animals around because of "low animal vibrations" or other veiled reasons to hide an inherent hate for beings other than human, as well as a possible jealousy for their greater understanding of Nature? Can we honestly and seriously accept such "philosophies" as a WAY to TRUTH?

The Lord Buddha permitted a cat to sleep near him and when he had to move, he cut away his sleeve so as not to disturb the slumbering feline. Are any latter day "philosophers" better or more spiritually advanced than Guatama Buddha?

For the Christians who might be swayed by "hate ideas," we have the

the picture of Joseph leading the pregnant Mary's donkey, and later the flight into Egypt. Jesus rode a donkey into Jerusalem - yet, did his personal contact with His younger brother in any way retard His spiritual advancement ?

Folklore, myths and legends (the true history, if we but have eyes to see and intuition to know) are full of man's need to consider all non-humans as a part of himself and his life. Man is but a part of humanity, and he must learn his part in it rather than as a would-be Supreme Intelligence.

Unidentified Flying Objects may carry animals for all we know, but if so they are kept safely tucked away from earthman's cruelty and greed when contact is made with earthlings. Great Beings love ALL LIFE. Only the vindictive and materialistic can have room to hate, persecute, abominate and abuse those of a different race or species.

EXTINCT RACE CREDITED WITH MOONS OF MARS

London, May 1 (AP) - A Soviet scientist said Friday the two tiny moons of Mars are artificial space stations, placed in orbit by a now-extinct race of Martians. I. Shklovskiy set forth his theory in the Communist youth paper, Komsomolskaya Pravda, quoted by Moscow radio.

Shklovskiy said the Martian moons, Phobos and Dimos, are probably hollow. From his observations, he believes they are slowly spiraling down toward Mars and ultimately will crash on its surface. The Soviet physicist said there is definite evidence that Phobos, the moon nearest Mars, is speeding up as it rotates about its parent planet. "Within the period of only a few decades," he declared, "it has gone 2-1/2 degrees farther ahead in its orbit than if its speed had been constant."

"This is the same behavior as that of artificial earth satellites. Their speed is slowed down by the resistance of the atmosphere and they lose height, going faster and faster as they approach the earth."

Shklovskiy said other supporting evidence includes the extremely small size of Phobos and Deimos and their unusual nearness to Mars compared with the satellites of other planets. The two moons are so tiny they eluded discovery by astronomers until 1877. Their weight is still unknown.

---Reprinted from "Net News", 1709 22nd St.,
Hondo, Texas

Vesta is the largest of a group of some 1,600 asteroids or planetoids which circle the sun in an orbit which is between that of Mars and Jupiter. These are invisible to the naked eye and range in size from approximately less than 50 miles in diameter to about 480. Vesta, the largest, is sometimes visible to the naked eye.

WHITE MAN'S MAGIC

Mr. Langton Zank, of 1208 Bishopsgate, Smith Street, Durban, Natal, has sent the REVIEW the following account given him by one of the natives employed by him. Mr. Zank writes that those who are familiar with South Africa and her less developed indigenous people know of their superstitions and lack of interest in the more civilized ways of large cities. "Here, then, is an account of one of those beings who has never heard of a flying saucer or the like, he added.

"My name is Bizezakhe Mbambo and I live about 30 miles from Durban in the native reserve at Umbumbulu.

"Many times have we watched and wondered at the magic of the white man in our sky at night. We often see these things and talk about them when we come together at night to drink kaffir beer and discuss our problems with the head men of our tribe.

"Sometimes we see big round lights in the sky, as big as the moon sometimes. They are like looking at the coals in a fire, they are going bright and dull all the time. Lots of times they stay there for hours, other times they fly away very fast, sometimes they just go out.

"One night one of these things was sitting in the sky when it shone a strong light onto a hill close by, it made the hill as bright as daytime.

"Three times we have seen a big long thing, as big as the boats on the Sea. When they fly away smoke comes out of the back. Twice they have flown very slowly straight along, but once this thing went very fast up into the sky.

"We have also seen big balls of fire shooting along near the ground, sometimes they break up and light up everywhere, other times they just go and go for miles till we can't see them any more. We get very frightened because they do not make a noise, so we don't know when they are coming."

Mr. Zank also wrote that after receiving this account he showed Bizezakhe Mbambo one of George Adamski's books to page through, and he picked out a photo of a mother ship and identified it as one of the things which they have seen.

LETTERS TO THE EDITOR

Dear Editor:

I have enjoyed Forum membership in the Spacecraft Research Association for about a year and a half and wish to take this opportunity to express myself regarding some of the problems that exist in our group.

During the past few months I have watched with a great deal of disappointment a wave of apathy sweeping over our Phoenix Forum membership group. The enthusiasm of the group seems to die a little each month. Many members of long standing have let their memberships expire, and the number of new faces has dropped to such an extent that, in my opinion, it is time to analyze the situation and see what corrective measures can be taken.

At the last monthly meeting it was announced that our permanent quarters would be at the Phoenix Church of Divine Truth, starting with our September meeting. This came as a shock to me because, as originally organized, our organization was not to be associated with any particular religious, political or social group. Even the subject matter of lectures and Forum meetings has been carefully defined in our Constitution. Article IV, Section 1, reads as follows:

"Any subject deemed to be interesting to the Forum Division and relating to spaceships, extra-terrestrial phenomena, mysticism, or the occult sciences may be used for program material. However, under no circumstances shall sectarianism religion, in contradistinction to comparative religion, be discussed, nor shall politics be touched upon unless it specifically relates to the discussion of spaceships, extra-terrestrial phenomena, mysticism or the occult sciences."

By using this church or any church as a meeting place we are putting ourselves in a position that may imply an affiliation and will become sufficient grounds for prospective members to think twice before joining our Forum group, believing our Association to be a religious one. Individual members have the right to belong to any organization of their own choosing, but our Association should use care and, generally speaking, "love them all but sponsor none."

There have been many complaints concerning the fact that we have not been having lectures. The last two lectures we sponsored were both by George Williamson and were separated by almost five months. George Williamson is one of our more prominent lecturers and could be enjoyed with profit frequently, but we should have more lecturers, and even though we don't agree with all of them, more contactees should be given the opportunity to speak. This may mean that we will sometimes go in the red financially, however, we are not a profit making organization and it is through our lecturers that we draw the attention of the public. Most of us who are Forum members have (at least to a degree) a deeper understanding of the subject of Spacecraft and have been interested in Flying Saucers and related subjects for a number of years, but we are not a small select group who merely meet for our own enjoyment and profit. It was brought to my attention at the convention in Los Angeles that it is our responsibility, as an organization, to awaken the public to an awareness of Spacecraft and the purpose of their present visits.

This is just one of the reasons for lectures.

There also have been complaints that members have lost their rights as Forum members and unless they accept policies set forth, its just too bad. Our By-laws have specific regulations concerning the election of officers which I will quote in part:

"The Nominating Committee shall present a slate at the annual meeting, . . . at which time, . . . Any member of the Forum Division may make additional nominations from the floor. . . . Election shall be by ballot. A chairman and two tellers shall be appointed to receive the ballots for the officers and trustees. They shall canvass the ballots so cast and announce the result to the presiding officer, who shall thereupon declare the members receiving the majority of the votes cast elected to the respective officers."

Does anyone remember seeing a ballot to mark? This is no reflection on the choice of officers, but there is certainly something wrong with the method by which they went into office. I should like to see our next election of officers conducted by means of the written ballot as provided for in our Constitution and By-laws.

These are just some of the problems as one member sees it. It matters not whether you agree or disagree with me, but I would like to hear the opinions of other members.

Sincerely,

Pat French

Dear Editor:

I thought members of Spacecraft Research Association would be interested in the following:

Ancient Maps Hint at 3000 B.C. Aerial Survey

Ancient maps brought to light after World War II and recently publicized by zoologist Ivan T. Sanderson in "Fantastic Universe" magazine indicate that the earth was accurately mapped about 5,000 years ago. It appears that some unknown pre-Greek civilization had a highly developed science and travelled extensively across the face of the earth.

Several NICAP (National Investigations Committee on Aerial Phenomena) members have asked about a possible tie-in with UFOs. A map expert says the mapping seems to have been done from the air.

Arlington H. Mallery, authority on one hundred ancient maps who brought the "Piri Reis" maps to the attention of the U.S. Hydrographic Office, stated that they could only have been made by an aggregation of skilled scientists familiar with astronomy as well as topographic surveying. In a Georgetown University Forum panel discussion Mallery said, "Maybe they had airplanes. We don't know

how they could map it so accurately without an airplane. (Bear in mind that this happened thousands of years ago. Dr. Williamson was right when he said, "Visitors from outer space have always been with us.")

Mallery's discovery has been confirmed by M. E. Walters, former Hydrographic Office cartographer, Rev. Daniel Linehan, Boston College seismologist, and I. G. Y. scientific panel member.

Projected in an unfamiliar way which initially puzzled cartographers, the maps showed the coastline of the South Atlantic in amazing detail. In addition, Mr. Mallery stated, they recorded not only part of the Antarctic coastline which is now buried under ice but every mountain range in Northern Canada and Alaska, including some which the Army Map Service did not have!

The "Piri Reis" maps are the oldest authentic records of man.

The above is taken from the U. F. O. Investigator, published by N. I. C. A. P. 1536 Connecticut Ave., N. W., Washington 6, D. C.

Very truly yours,

Mrs. Lewis Stine
Associate member of S. R. A.

(Ed. Note: A copy of these maps, together with a transcript of a panel discussion between the persons above mentioned, may be obtained by sending 10¢ to The Georgetown University Forum, Washington 7, D. C. Ask for "New and Old Discoveries in Antarctica.")

Dear Editor:

Betty Eilers did a splendid job reviewing the book, "Kinship With All Life," by J. Allen Boone, at the August meeting of the Forum Division.

I had success in making a pet of a fly like the Freddy mentioned in the book and found it fascinating.

Mr. Limb, one of our members, had quite an experience with some ants that were making a nuisance of themselves in his back yard. Several times he asked them to move into the big field in back of his home. Instead they moved just across the driveway into his neighbors' back yard.

THE WORLD IS WOBBLING

"Have you heard, Mrs. Jones, the world is wobbling?"
 "Dear me, Mrs. Brown. What a terrible thing."
 "Oh, yes, it's true. 'Though it's only slight,
 It's enough to give old folk a fright,
 And they say the matter is quite out of hand
 And you and I can only stand
 And let it wobble this way and that.
 So I've decided, my dear, to BUY that new hat,"
 "Oh, I should, Mrs. Jones. Why should we save
 If this is the way the world's going to behave?
 Though I don't blame the world,
 I suppose one day it will tire
 Of whirling around, and want to retire.
 After all, most things wobble a bit, now and then,
 Small boys on bicycles, governments, men."
 "I agree, Mrs. Brown. And it could be collyfobbling
 With all these bombs has set the world wobbling."
 "Could be, Mrs. Jones. But I wouldn't lose any sleep.
 Like most of our worries this one will keep.
 It's wobbled so long, one more wobble won't hurt,
 We'll still have to wash and iron his shirt."

BRITISH TO TRY VENUS CONTACT

London, July 11 -- An attempt to make contact with the brilliant planet Venus by bouncing radio waves off it will be made this fall, British scientists have announced.

Venus, several times brighter than any star, will be at its closest for 18 months during September - 30 to 40 millions miles away. The attempt will be made with Britain's Jodrell Bank telescope.

Echoes from the planet may be obtained from a single radio pulse and displayed on a cathoderay screen. Astronomers learn more about Venus every year. They cannot be quite sure that there is no life there.

THE SPACECRAFTER

LIBRARY NEWS

Our Librarian, Gladys van Derslice, has the following books for sale. They can be purchased at our meetings or you may call at her home, 4203 North 15th Drive, in Phoenix, Telephone: AM 5-2915.

Son of the Sun	\$3.95	They Shall Be Gathered Together	\$2.00
Twenty Trillion Light Years		The Secret of the Saucers	3.00
Through Space	2.75	Looking Backward	.75
Why We Are Here	3.75	Two Nights To Remember	
Dweller On Two Planets	7.50	Flying Saucer Revelations	3.00
The Aquarian Gospel	4.00	The Atomic World	2.50
Secret Places of the Lion	4.00	Finding of the Third Eye	2.50
Soarings of the Eagle	1.25	Wisdom in Practice	2.50
Council of the Seven Lights	3.50	Flying Saucer From Mars	2.75
Flying Saucer Pilgrimage	3.50	Steps to the Stars	1.50
Flying Saucers and the Straight		Look Up!	2.00
Line Mystery	4.00	UFO's Confidential	3.00
The Kearney Incident and		My Trip to Mars, the Moon	
To the Arctic Circle in a		and Venus	1.00
Spacecraft	1.25	Healthy Hunzas	3.00
Concrete Evidence	1.00	Voice of the Planet Clarion	1.25
The Inexplicable Sky	3.95	Mucousless Diet	2.00
We Come In Peace	1.00	Understanding Magazine	.25
White Sands Incident	1.50	Excelsior Magazine	.50
Flying Saucers Have Landed	3.50	Aboard a Flying Saucer	3.00

If you wish to purchase a book which is not listed, please advise our Librarian and she will make every attempt to procure the book for you.

Our rental library contains most of the above books, together with others which have been donated by members. You may call our Librarian and request that the book of your choice be brought to our meetings from our rental library or pick them up at her home. The charge is 25¢ per month.

RECOMMENDED READING

SON OF THE SUN, by Orfeo Angelucci \$3.95

This is the unusual story of a man with only a few months to live who was taught Life's true meaning while on a huge mother space ship stationed a short distance from the Planet Venus. The beauty of the philosophy expounded in this book makes it "must" reading for anyone interested in the fields of spacecraft, New Thought, or metaphysics. This book, by a well known author and lecturer, is highly recommended for your enjoyment and enlightenment.

TWENTY TRILLION LIGHT YEARS THROUGH SPACE, by Leo Virg \$2.75

This book dramatizes the most challenging field in modern thought by reopening the avenue between science and religion.

HAVE YOU READ A GOOD NEW BOOK RECENTLY?
