Steven Warner, Sub-Ed.

issued irregularly

Topic One:

We do not know for sure that the Giant Rock Spacecraft Convention will be held this year. However, if it is, we are considering holding a small convention of the like here in Pomona, California. We could ask publishers such as James W. Moseley & Gray Barker to send us sample issues of SAUCER NEWS & SAUCERIAN BULLETIN to sell on the stands. They will be sent approximately one half of what the issue sells for, and the rest will go to pay for our new miniograph machine. In other words, we will charge 35¢ for every 25¢ magazine, and give the publisher 25¢ for it. This is still about five cents over what it normally costed. This will, naturally, be an amateur production, so we will sell tickets beforehand to insure a fairly large audience. Our questions on this subject are as follows:

- 1). If such a convention were held, could you attend ? YES NO (circle one) POSSIBLY
2). Do you feel a convention is a wise idea ? YES NO (circle one)
3). If you publish a magazine, would you allow us to sell it at the price listing above ? YES NO (circle one) If not, suggest a better arrangement:
4). Can you give any suggestions to us on how this might be held ? YES NO

Do you think it would be a wise idea to tie this convention to about the same date as Van Tassels ? So many of his following would attend our convention, and possibly many of his speakers too ? YES NO (circle one)

Please understand that this is still quite in the "idea" stage, but before it even "gets out of the brain and onto the drawing board", we want a majority vote from our Board of Advisors. The last issues voting was successful on most points. The duplication will be done on plan two also. Plan one was

carried out in our April-May gala issue. It achieved great results. Plan Two will try to make models like the top UFO photos to prove it very obviously can be done.

Topic Two:

We are in desperate need of articles for the Hawk Researcher. Now that we have expanded the publication, we need articles on various subjects and phases of the UFO mystery, and soon. Re-prints soon bore readers. We need fresh material, and fresh approaches to controversy. As many know, Mr. Barker and Mr. Moseley..er, don't get along. I won't take sides because I like them both. But, perhaps Mr. Moseley could write what he has against Mr. Barker, and Mr. Barker answer the charges and counter them. It will do us all good to get it in the open. By the way, Gray, where is my copy of FLYING SAUCERS & THE THREE MEN ? I think it has gotten lost in the mail, but I can dream. I'll order a other one if it has been sent out already. At any rate, please, try to write an article for us. Any length will do. We can handle as much material as you can write, or as little. Letters to the Editor are needed, too.

--Harry S.

Topic Three: Our organization has grown tremendously in the past while. I want to apologize for stupid blunders like taking it for granted Brinsley Le Poer Trench would be on our Board of Advisors. Unfortunately, I thought he had agreed, but found I had forgotten to ask ! Also, I keep asking favors and articles, etc. This may be wrong, but we are getting on our feet and show real promise at last. I have a theory about UFO's that I will break soon. See if you can guess what it is. Meanwhile, please be patient with me while I grow up.

HAWK RESEARCH SOCIETY
1457 KENWOOD DRIVE
POMONA, CALIFORNIA
U.S.A.

Dear friend:

This is to notify those interested in my organization that for a short period of time this summer I will not be reached at my usual address as shown above.

My new address will be : Harry R. Siebert, c/o Mrs. H.H. Cazier, Wells, Nevada. If you wish information on Hawk Research Society, I would suggest that you contact Mr. Steven R. Warner, 331 Dupont Street, Pomona, California. Mr. Warner is Vice President of our organization. The exact date of my departure is not known. However, I will set the date as the 18th of this month, July, as when I shall leave for the other address.

Any mail that is expected to reach me after that date should be sent to the forwarding address. I have made arrangements to have all recieved mail forwarded, but that will cause extra delay.

I regret this inconvenience, however I will be indulging in new research while at this address, on the ranch of the Cazier, by grandparents, while Mrs. Cazier is in the hospital.

If any saucer researcher has a task or request that I might fulfill while in this area, which is quite close to Elko, Nevada, please notify me and I will do my best to aid you.

No absolute return date is known yet. You will be notified. To my members this may mean a slight delay in bulletin issues, but nothing serious; that is, no long space of time, over a month or so, will elapse.

Sincerely Yours;

HAWK RESEARCH SOCIETY

Harry R. Siebert, President
