NUMBER 1

Test Pilot Joe Walker scoffing at reports of danger because of control failure in the X-15 rocket-plane: "Heck, I had more trouble driving home in the traffic".

NEW CONCEPT PROPOSED FOR LOOK-SEE

Atlanta, Georgia- October 12, 1962- (LS) - ROAP Director Greenfield proposes a unique method to further promote member-group information exchange, another step towards UFO group unity:

- 1) Each member-group is requested to submit an editorial concerning their group's position on UFOlogy, or some aspect of UFOlogy.
- 2) The Look-See will print one such editorial in each week's issue, eventually covering all member-groups which submit an editorial.

This proposal, we feel, will help our member-groups better understand each other. Editorials should not exceed one-half page, single spaced, in English. Send these to: Look-See, 2875 Sequoyah Drive, N.W., Atlanta 5, Georgia. We urge ALL member-groups to take advantage of this opportunity to aid your fellow UFOlogists....and yourself.

MEMBER-GROUP MERGES WITH UFOLOGY FOUNDATION

Cleveland, Ohio- October 10, 1962- (LS) - The UFOlogy Foundation of Ohio has merged with alliance member-group UFOFC to form the United Saucer Council of Ohio. The newly-formed group plans to merge the bulletins of the two 'elder' groups and begin publishing a 16-32 page magazine on UFOlogy in January or February, 1963. The publication will be published bi-monthly. (SOURCE: ROAP, Atlanta, Georgia).

NEWS BRIEFS:

The Alliance would like to welcome another new member-group, the recently formed UFOlogy-Miami of Miami, Florida.

At approximately 9:00 P.M. Friday, October 8th, 1962, Harry Siebert, President of the Hawk Research Society, received a telephone call from a person who had just seen a UFO heading toward Puddingstone Dam in Pomona, California. Mr. Siebert received several other telephoned reports, among them the Vice-President of HRS, Steven Warner, who was following the object with binoculars. By 3:00 the next day, Mr. Siebert had thoroughly checked all aspects of the sighting reports, checked witnesses stories, and decided that the object could not be explained by any conventional means. A copy of his report was dispatched to Edwards Air Force Base. (SOURCE: Harry Siebert, from an article sent to ROAP).

Send those reports to Look-See, 2875 Sequoyah Drive, N.W., Atlanta 5, Ga.

Some forms of life may exist on Mars near "hot spots" caused by hot springs and volcanoes. Even though the Martian environment is harsh by earth standards, the planet could be "Life bearing", Nobelist Joshua Lederberg and Dr. Carl Sagan of Stanford University, Stanford, California, believe. (SNL for October, 13, 1962).
