UNITED UFOLOGY-STILL A DREAM!

By Keith Jenkins UUA Court Committee

The United UFOlogical Association was born on December 22, 1962, by a combining of the International UFO Information Exchange Alliance and the National Aeropenomena Research League. Now, notice the name of that great new organization: UNITED UFOlogical Association.

United? Bologna!! The UUA is no more united than a coop full of hens! Allen Greenfield and Alan Katz tried to help UFOlogy, but they just laid a big fat goose-egg! And do you know whose fault it was? Yours!! Yes, you with the innocent look on your face.

Everyone of you has done something to destroy the UUA. I haven't noticed too many sightings in the Look-See these days, but strangely enough I see many in your bulletins. What gives? Do you want to keep all the glory to yourself? Yep! That's the answer. Little Mr. Ego (who incidently doesn't seem to be too little recently) steps in and makes you say something like, "Why should I let them use my sightings? They were sent to me, for me to use. If they care about it, they can copy it when the bulletin comes out". That's united UFOlogy?

Over the last three months the number of sightings in the Look-See has gone down considerably. This is partially due to the decrease in sightings, and to the increase in laziness on your part. You must admit that you think the UUA is good, but it carries low-class information, as compared with your bulletin. If your bulletin has so many great articles, why don't you give the UUA some? Because, Mr. Ego walks in the door again and ruins the whole shebang!

I admit that I, too, am guilty of not cooperating in full. So how about us all throwing Ego out on his ears, and start UNITING? The UUA will then, and only then, be truly the United UFOlogical Association.

We all know, I hope, that flying saucers exist. But our members must be constantly convinced of it, unless they are the small minority that are very active in research, or they will drop out (Ed. note-what about the active ones that also drop out?). You don't like to lose members do you? The UUA can provide you with the information to keep these members "alive", so to speak. Let's all pitch in and UNITE!!!!

***Your summer editor agrees with Mr. Jenkins 100% I constantly see many member-groups use sightings in their bulletins that they never send to the UUA. I hope the UUA may adopt a "get-tough policy, to save itself and the UFO research. More about this in the future.
